PROMPT: "THE RESEARCH REVEAL" FRAMEWORK (BREAKING NEWS COPY)

Copy and paste everything below into Claude with your inputs.

REQUIRED INPUTS

I am generating ad copy for my brand **[YOUR BRAND NAME]**. We sell **[PRODUCT].**

We are writing for **[INSERT MACRO AVATAR # HERE]**

Our website is **[YOUR WEBSITE].**

[COPY & PASTE PRODUCT DESCRIPTION]

[ATTACH MACRO AVATAR SHEET OUTPUT]

[ATTACH MACRO AVATAR LANGUAGE BANK OUTPUT]

WHAT THIS FRAMEWORK DOES

Generates short-form "breaking news" style ad copy (400-500 words) using "The Research Reveal" framework.

This framework uses research, statistics, or studies to create credibility and pattern interrupt.

Structure: 0. Hook (1-3 sentences)

1. Research reveal (2-3 sentences with stat/study)
2. "But here's the kicker" pattern interrupt
3. Real problem reveal (what's actually causing it)
4. Mechanism explanation (why it happens)
5. Negative consequences with ❌ formatting
6. "Luckily, there's a simple fix"

7. Product introduction
8. How it works
9. Positive outcomes with ✅ formatting
10. Emotional desire resolution + CTA with risk reversal

Total length: 400-500 words

Optimized for Facebook/Instagram: Heavy line breaks, strategic emojis, research-backed credibility.

PHASE 1: PAIN POINT SELECTION

First, I'll analyze your Macro Avatar sheet and extract all the pain points.

OUTPUT:

=== PAIN POINTS IDENTIFIED ===

Based on your Macro Avatar sheet, here are the primary pain points:

1. [Pain point from avatar sheet]

    - Emotional intensity: [X/5 based on language bank]
    - Primary emotion: [Fear/Frustration/Anxiety/Guilt]
    - Core desire behind this pain: [What they emotionally want]
    - Language bank coverage: [Strong/Moderate/Light]
    - Research availability: [Likely/Possible/Difficult]
2. [Pain point from avatar sheet]

    - Emotional intensity: [X/5]
    - Primary emotion: [Fear/Frustration/Anxiety/Guilt]
    - Core desire behind this pain: [What they emotionally want]
    - Language bank coverage: [Strong/Moderate/Light]
    - Research availability: [Likely/Possible/Difficult]
3. [Pain point from avatar sheet]

    - Emotional intensity: [X/5]
    - Primary emotion: [Fear/Frustration/Anxiety/Guilt]
    - Core desire behind this pain: [What they emotionally want]
    - Language bank coverage: [Strong/Moderate/Light]
    - Research availability: [Likely/Possible/Difficult]

4. [Pain point from avatar sheet]

    - Emotional intensity: [X/5]
    - Primary emotion: [Fear/Frustration/Anxiety/Guilt]
    - Core desire behind this pain: [What they emotionally want]
    - Language bank coverage: [Strong/Moderate/Light]
    - Research availability: [Likely/Possible/Difficult]

[Continue for all pain points found in avatar sheet, typically 3-7 total]

👉 SELECT THE PAIN POINT FOR THIS AD: Type the number (1-7)

PHASE 2: RESEARCH & STAT FINDING

Now I need to find REAL research or statistics related to this pain point.

OUTPUT:

=== RESEARCH SEARCH ===

Pain Point: [Selected pain point]

Searching for real research, studies, or statistics related to this pain point...

[Use web search to find actual studies, statistics, or research papers related to this pain point]

Research Found:

Option 1:

- Source: [Name of study/organization/journal]
- Statistic/Finding: [The actual stat or finding]
- Credibility: [Why this is trustworthy - e.g., peer-reviewed, government data, major institution]
- Relevance: [How this relates to the pain point]
- Hook potential: [High/Medium/Low - how shocking/interesting is this?]

Option 2:

- Source: [Name of study/organization/journal]

- Statistic/Finding: [The actual stat or finding]
- Credibility: [Why this is trustworthy]
- Relevance: [How this relates to the pain point]
- Hook potential: [High/Medium/Low]

Option 3:

- Source: [Name of study/organization/journal]
- Statistic/Finding: [The actual stat or finding]
- Credibility: [Why this is trustworthy]
- Relevance: [How this relates to the pain point]
- Hook potential: [High/Medium/Low]

IF NO RESEARCH FOUND:

I couldn't find credible research or statistics for this specific pain point.

Your options:

1. Provide your own stat/research (must be real and verifiable)
2. Select a different pain point from Phase 1
3. Use a different framework (this framework requires research/stats)

👉 SELECT YOUR RESEARCH/STAT: Type the number (1-3) to use one of the options above

OR

Type "MY STAT: [your statistic with source]" if you have your own

OR

Type "NEW PAIN POINT" to go back to Phase 1

PHASE 2B: HOOK GENERATION

Now I'll generate hooks that tease the research/stat without giving it away.

OUTPUT:

=== HOOK GENERATION ===

Research Being Used: [The selected stat with source]

Pain Point: [The pain point being addressed]

Core Emotion: [The primary emotion from Phase 1]

I'll generate 10 hook options that tease this research finding and stop the scroll.

HOOK REQUIREMENTS:

- Tease the research/stat without revealing the exact number
- Create curiosity about what they're about to learn
- Tap into the core emotion (fear/anxiety/frustration/guilt)
- Use avatar language from language bank when possible
- Broad enough to work on cold traffic
- NOT overly specific or jargon-heavy

HOOK OPTIONS:

HOOK #1: "[Hook teasing the research]"

- Pattern: [Which headline pattern this uses]
- Why it works: [How it creates curiosity about the stat]

HOOK #2: "[Hook]"

- Pattern: [Which pattern]
- Why it works: [Explanation]

HOOK #3: "[Hook]"

- Pattern: [Which pattern]
- Why it works: [Explanation]

HOOK #4: "[Hook]"

- Pattern: [Which pattern]
- Why it works: [Explanation]

HOOK #5: "[Hook]"

- Pattern: [Which pattern]
- Why it works: [Explanation]

HOOK #6: "[Hook]"

- Pattern: [Which pattern]
- Why it works: [Explanation]

HOOK #7: "[Hook]"

- Pattern: [Which pattern]
- Why it works: [Explanation]

HOOK #8: "[Hook]"

- Pattern: [Which pattern]
- Why it works: [Explanation]

HOOK #9: "[Hook]"

- Pattern: [Which pattern]
- Why it works: [Explanation]

HOOK #10: "[Hook]"

- Pattern: [Which pattern]
- Why it works: [Explanation]

TOP 3 RECOMMENDED:

→ Hook #[X] - [Why this is strongest for this avatar/emotion/stat] → Hook #[X] - [Why this works well] → Hook #[X] - [Why this is good]

👉 SELECT YOUR HOOK: Type the number (1-10)

OR

Type "YOUR OWN HOOK: [your hook]" if you have a different one

Once selected, type "CONTINUE TO LANGUAGE EXTRACTION"

PHASE 3: PAIN POINT LANGUAGE EXTRACTION

Now I'll extract the exact language your avatar uses for this pain point.

OUTPUT:

=== PAIN POINT LANGUAGE EXTRACTION ===

Pain Point Being Addressed: [The selected pain point]

Core Emotional Desire: [What they want emotionally]

Research/Stat Being Used: [The selected stat with source]

Hook Selected: [The hook they chose]

Avatar's Exact Language (From Language Bank):

Primary phrases (use in problem reveal section):

- "[Exact phrase from language bank]" from [Section name]
- "[Exact phrase from language bank]" from [Section name]
- "[Exact phrase from language bank]" from [Section name] [3-5 phrases total]

Consequence phrases (use for negative outcomes):

- "[Exact phrase about consequences]" from [Section name]
- "[Exact phrase about consequences]" from [Section name] [2-3 phrases total]

Relief/hope phrases (use for positive outcomes):

- "[Exact phrase about desired outcome]" from [Section name]
- "[Exact phrase about transformation]" from [Section name] [2-3 phrases total]

Desire resolution phrases (use for emotional resolution):

- "[Exact phrase about what they want emotionally]" from [Section name]
- "[Exact phrase about desired state]" from [Section name] [2-3 phrases about relief, peace, control, confidence]

Emotional Tone: [Primary emotion: Fear/Frustration/Anxiety/Guilt]

Intensity Level: [X/5]

👉 Type "CONTINUE TO EMOJI SELECTION"

PHASE 4: EMOJI STRATEGY

Now I'll analyze your product, avatar, and pain point to recommend contextually appropriate emojis.

OUTPUT:

=== EMOJI RECOMMENDATIONS ===

Context Analysis:

Product category: [Category] Avatar demographics: [Gender, age range, key characteristics] Pain point emotion: [Primary emotion] Framework: Research Reveal (requires credibility + visual formatting)

Recommended Emoji Set for This Ad:

For Negative Consequences (3-4 options): ❌ [X mark - universal] [Emoji] - [Why this makes sense for this context] [Emoji] - [Why this makes sense for this context] [Emoji] - [Why this makes sense for this context]

For Positive Outcomes (3-4 options): ✅ [Checkmark - universal] [Emoji] - [Why this makes sense for this context] [Emoji] - [Why this makes sense for this context] [Emoji] - [Why this makes sense for this context]

For Product/Solution (1-2 options): [Emoji] - [Why this makes sense for this context] [Emoji] - [Why this makes sense for this context]

For CTA (1-2 options): 👉 [Pointing finger - universal] [Emoji] - [Why this makes sense for this context]

Total Emoji Budget: 12-18 emojis across the entire ad

This framework uses more emojis than "Experienced Owner" because of the bullet-heavy visual formatting.

Example Placement Strategy:

- Section 0 (Hook): 0-1 emojis
- Section 1 (Research reveal): 0-1 emojis
- Section 2 (Pattern interrupt): 0 emojis
- Section 3 (Problem reveal): 0-1 emojis
- Section 5 (Negative consequences): 3-5 ❌ bullets
- Section 6 (Solution intro): 1 emoji
- Section 7 (How it works): 0 emojis
- Section 9 (Positive outcomes): 3-5 ✅ bullets
- Section 10 (CTA): 1-2 emojis

👉 APPROVE EMOJI STRATEGY: Type "APPROVED" to use these emojis Type "MODIFY: [your changes]" to adjust Type "MINIMAL EMOJIS" to only use ✅ ❌ 👉

Once approved, type "GENERATE COPY"

PHASE 5: COPY GENERATION

Now I'll generate the complete ad using the research reveal framework.

CRITICAL WRITING RULES

1. RESEARCH CREDIBILITY

The research/stat MUST be presented accurately.

Include the source name in Section 1 (e.g., "NCBI found", "Studies show", "Research from [institution]").

Do NOT exaggerate or misrepresent the finding.

2. AVATAR LANGUAGE INTEGRATION

Use language bank phrases in:

- Problem reveal section (why this matters to them)
- Negative consequences (their fears)
- Positive outcomes (their desired transformation)
- Emotional resolution (what they want emotionally)

3. SENTENCE STRUCTURE

Average sentence length: 8-12 words.

This framework uses shorter, punchier sentences than "Experienced Owner."

Create urgency and impact through brevity.

4. FORMATTING FOR FACEBOOK/INSTAGRAM

Line Breaks:

- Break after every 1-2 sentences
- Extra white space around the ❌ and ✅ bullet sections
- Makes research digestible

Emoji Usage:

- Heavy use of ❌ for negative consequences (3-5 bullets)
- Heavy use of ✅ for positive outcomes (3-5 bullets)
- Strategic use of approved emojis elsewhere
- Total: 12-18 emojis

Paragraph Structure:

- 1-2 sentences per paragraph MAX
- Bullet sections get extra spacing

5. PATTERN INTERRUPT

The phrase "But here's the kicker" or similar must appear after the stat.

This is the framework's signature move.

Alternatives:

- "But here's what's crazy"
- "But here's the real problem"
- "But here's what they're not telling you"
- "Here's what's really happening"

6. THE "LUCKILY" TRANSITION

After showing negative consequences, use:

- "Luckily, there's a simple fix"
- "But here's the good news"
- "Fortunately, there's a solution"

This pivots from fear to hope.

7. CONVERSATIONAL BUT CREDIBLE

Balance authority (research) with relatability (avatar language).

Not overly scientific. Not too casual either.

Trustworthy but accessible.

8. EMOTIONAL DESIRE RESOLUTION (NEW)

In Section 10, after positive outcomes and before CTA, include 1-2 sentences that resolve the core emotional desire.

This is NOT about functional outcomes.

This IS about emotional payoff (peace, control, relief, confidence).

Use desire resolution phrases from the language bank.

COPY OUTPUT

=== THE RESEARCH REVEAL AD ===

TARGETING REMINDER: Avatar: [Identifier] Pain Point: [The specific pain being addressed] Core Emotional Desire: [What they want emotionally] Emotional Tone: [Primary emotion] Intensity: [X/5] Research Used: [The stat/study with source] Hook Selected: [The hook] Emoji Strategy: [Approved emoji set]

SECTION 0: HOOK

[The selected hook - 1-3 sentences]

[Line break after each sentence if multi-sentence]

[Optional approved emoji for emphasis]

Word count target: 15-40 words

Formatting: This appears BEFORE the research reveal. Sets up curiosity.

Example format:

> [Hook sentence 1].
>
> [Hook sentence 2 if needed].

SECTION 1: RESEARCH REVEAL

[Opening statement - 1 sentence]

[Line break]

[Source name] found that [statistic]. [Or: Research from [source] shows that [finding].]

[Line break]

[Additional shocking context if needed - 1 sentence]

Word count target: 30-50 words

Formatting: Line breaks after every 1-2 sentences. Keep punchy.

Example format:

> The research is now out.
>
> [Source name] found that [statistic].
>
> [Additional detail if relevant].

SECTION 2: PATTERN INTERRUPT + PROBLEM REVEAL

[Pattern interrupt phrase: "But here's the kicker" or alternative]

[Line break]

[Real problem reveal - what's actually causing this - 1-2 sentences]

[Line break]

[Why this is the real issue - 1-2 sentences using avatar language if possible]

Word count target: 40-60 words

Formatting: Line break after pattern interrupt. Line break after every 1-2 sentences.

Example format:

> But here's the kicker.
>
> [Surface problem] isn't actually the real problem.
>
> [Real problem reveal].
>
> [Why this matters].

SECTION 3: MECHANISM EXPLANATION

[Transition: "When [situation]..." or "Here's what happens..."]

[Line break]

[Explain the mechanism - 2-3 sentences]

[Line break]

[Connect to avatar's experience using language bank phrase]

Word count target: 40-60 words

Formatting: Line break after every 1-2 sentences.

Example format:

> When [situation happens]...
>
> [Mechanism explanation].
>
> [Why this creates the problem].

SECTION 4: NEGATIVE CONSEQUENCES

[Transition: "So..." or "As a result..." or "Without [solution concept]..."]

[Line break]

❌ [Negative consequence 1 - use avatar language]

[Line break]

❌ [Negative consequence 2 - use avatar language]

[Line break]

❌ [Negative consequence 3 - use avatar language]

[Line break]

[Optional ❌ consequence 4-5 if supported by avatar research]

[Line break]

[Summary impact statement - 1 sentence]

Word count target: 60-90 words

Formatting: Each ❌ bullet gets its own line. Line break after each. Extra space before summary statement.

Example format:

> Without [solution concept]:
>
> ❌ [Consequence using avatar's language].
>
> ❌ [Another consequence].
>
> ❌ [Another consequence].
>
> [Summary of overall impact].

SECTION 5: SOLUTION TRANSITION

[Transition: "Luckily, there's a simple fix" or "But here's the good news" or similar]

[Line break]

[1-2 sentences introducing the concept of the solution - not product yet]

[Optional approved emoji for emphasis]

Word count target: 20-40 words

Formatting: Line break after transition. Keep short and hopeful.

Example format:

> Luckily, there's a simple fix. [Emoji if approved]
>
> [What the solution concept is in simple terms].

SECTION 6: PRODUCT INTRODUCTION

[Product name + what it is - 1 sentence]

[Line break]

[How it addresses the root cause from Section 3 - 1-2 sentences]

Word count target: 30-50 words

Formatting: Line breaks for readability.

Example format:

> [Product name] [what it does].
>
> [How it solves the mechanism problem].

SECTION 7: HOW IT WORKS

[Key feature 1 - 1 sentence]

[Line break]

[Key feature 2 - 1 sentence]

[Line break]

[Why these features matter - 1 sentence]

Word count target: 30-50 words

Formatting: Line break between features. Keep simple and credible.

Example format:

> [Feature 1].
>
> [Feature 2].
>
> [Why this combination solves the problem].

SECTION 8: POSITIVE OUTCOMES

[Transition: "The result?" or "This means..." or "So..."]

[Line break]

✅ [Positive outcome 1 - use avatar language]

[Line break]

✅ [Positive outcome 2 - use avatar language]

[Line break]

✅ [Positive outcome 3 - use avatar language]

[Line break]

[Optional ✅ outcome 4-5 if supported by avatar research]

[Line break]

[Summary transformation statement - 1 sentence using avatar language]

Word count target: 60-90 words

Formatting: Each ✅ bullet gets its own line. Extra space before summary.

Example format:

> The result?

> ✅ [Positive outcome from language bank].
>
> ✅ [Another positive outcome].
>
> ✅ [Another positive outcome].
>
> [Transformation summary].

SECTION 9: EMOTIONAL RESOLUTION + CTA

EMOTIONAL DESIRE RESOLUTION (NEW - CRITICAL):

[1-2 sentences resolving the core emotional desire using desire resolution phrases from language bank]

[This addresses what they EMOTIONALLY want, not functional outcomes]

[Use phrases like: "And you can finally stop...", "No more living in constant...", "You finally have..."]

[Line break]

[Call to action - 1 sentence creating urgency from the research]

[Line break]

[CTA emoji] [Action statement]

[Line break]

[Risk reversal - 1 sentence]

[Line break]

[URL]

Word count target: 50-80 words

Formatting: Emotional resolution comes first, then CTA. Line breaks throughout.

Example format:

> And you can finally [emotional desire resolution using language bank]. [Optional second sentence reinforcing relief].

[Urgency statement tied to research].

👉 [Direct action].

[Guarantee/risk reversal].

[URL]

==========

📊 COPY METADATA

Total Word Count: [X words - should be 400-500]

Research Citation:

- Source: [Full source name]
- Finding: [The exact stat/finding used]
- Accuracy: [Confirmed accurate representation: Yes/No]

Hook Used: "[The selected hook]"

- Pattern: [Which pattern it uses]

Avatar Language Integration:

Section 0 (Hook):

- "[Exact phrase if used]" from [Language Bank Section]

Section 2 (Problem Reveal):

- "[Exact phrase used]" from [Language Bank Section]

Section 3 (Mechanism):

- "[Exact phrase used]" from [Language Bank Section]

Section 4 (Negative Consequences):

- "[Exact phrase used]" from [Language Bank Section]
- "[Exact phrase used]" from [Language Bank Section]
- "[Exact phrase used]" from [Language Bank Section]

Section 8 (Positive Outcomes):

- "[Exact phrase used]" from [Language Bank Section]
- "[Exact phrase used]" from [Language Bank Section]
- "[Exact phrase used]" from [Language Bank Section]

Section 9 (Emotional Resolution):

- "[Exact phrase used for emotional resolution]" from [Language Bank Section - Transformation/Desire/Identity]

Total phrases used: [X - should be 10-15]

Sentence Structure Analysis:

- Average sentence length: [X words - should be 8-12]
- Longest sentence: [X words]
- Shortest sentence: [X words]
- Rhythm: [Should be punchy and urgent]

Formatting Analysis:

Line Breaks:

- Total line breaks: [X - should be 25-35]
- Average sentences per paragraph: [X - should be 1-2]
- Dense blocks: [X - should be 0]

Emoji Usage:

- Total emojis: [X - should be 12-18]
- ❌ bullets: [X - should be 3-5]
- ✅ bullets: [X - should be 3-5]
- Other approved emojis: [X]
- All from approved set: [Yes/No]

Visual Impact:

- Bullet sections visually distinct: [Yes/No]
- White space around consequences: [Yes/No]
- Scannability: [High/Medium/Low - should be High]

Emotional Resolution:

- Core desire addressed: [Yes/No]
- Uses desire resolution phrases from language bank: [Yes/No]
- Feels like emotional payoff/relief: [Yes/No]

✓ QUALITY CHECKLIST

Research Credibility: ✓ Real research/stat used (not fabricated) ✓ Source named accurately ✓ Finding represented accurately ✓ No exaggeration or misrepresentation

Framework Structure: ✓ Hook opens the ad (Section 0) ✓ Research reveal follows hook (Section 1) ✓ Pattern interrupt after stat ("But here's the kicker") ✓ Real problem revealed ✓ Mechanism explained ✓ Negative consequences with ❌ bullets (3-5) ✓ "Luckily" transition to solution ✓ Product introduced ✓ How it works explained ✓ Positive outcomes with ✅ bullets (3-5) ✓ Emotional desire resolved before CTA ✓ CTA with risk reversal

Language Bank Integration: ✓ Avatar phrases in problem reveal ✓ Avatar phrases in negative consequences ✓ Avatar phrases in positive outcomes ✓ Desire resolution phrases in Section 9 ✓ 10-15 exact phrases used naturally

Sentence Structure: ✓ Average 8-12 words per sentence ✓ Punchy, urgent rhythm ✓ Varied sentence lengths ✓ Natural flow

Formatting: ✓ Line breaks after every 1-2 sentences ✓ NO dense blocks ✓ ❌ bullets formatted with spacing ✓ ✅ bullets formatted with spacing ✓ Emojis from approved set only ✓ Total emoji count: 12-18 ✓ Mobile-friendly

Emotional Resolution (NEW): ✓ Section 9 includes 1-2 sentences resolving emotional desire ✓ Uses desire resolution phrases from language bank ✓ Addresses what they WANT emotionally ✓ Feels like relief/release/permission ✓ Placed after outcomes, before CTA urgency

Tone: ✓ Credible (research-backed) ✓ Urgent (consequences are real) ✓ Hopeful (solution exists) ✓ Accessible (not overly scientific)

👉 USER ACTIONS:

Type "APPROVED" → Copy is ready

Type "REVISE [section name]" → Regenerate section

Type "MORE LINE BREAKS IN [section name]" → Add breathing room

Type "MORE AVATAR LANGUAGE IN [section name]" → Add phrases

Type "STRENGTHEN EMOTIONAL RESOLUTION" → Make desire resolution more impactful

Type "VERIFY RESEARCH" → Double-check stat accuracy

Type "DIFFERENT STAT" → Go back to Phase 2

Type "DIFFERENT HOOK" → Go back to Phase 2B

Type "DIFFERENT EMOJIS" → Go back to Phase 4

Type "NEW PAIN POINT" → Go back to Phase 1

SYSTEM INSTRUCTIONS FOR CLAUDE

When executing this prompt:

Phase 1: Pain Point Selection

- Extract all pain points from avatar sheet
- For each, identify core emotional desire behind it
- Estimate research availability
- Present numbered list
- Wait for selection

Phase 2: Research Finding (CRITICAL)

- Use web_search to find REAL research/stats for selected pain point
- Search terms: "[pain point] + study/research/statistics"
- Prioritize: peer-reviewed studies, government data, major institutions
- Present 3 options with full source names
- Do NOT fabricate statistics
- If no credible research found, inform user and offer alternatives
- Wait for selection or user-provided stat

Phase 2B: Hook Generation (NEW)

- Generate 10 hook options that tease the research without revealing exact stat
- Hooks should create curiosity about what they're about to learn
- Tap into core emotion (fear/anxiety/frustration/guilt)
- Use avatar language when possible
- Keep broad for cold traffic

- Recommend top 3
- Wait for selection

Phase 3: Language Extraction

- Extract avatar phrases related to pain point
- Categorize: primary (problem reveal), consequences (negative), relief (positive), desire resolution (emotional payoff)
- Pull exact phrases word-for-word
- Find 2-3 desire resolution phrases about emotional wants
- Wait for continuation

Phase 4: Emoji Strategy

- Analyze context
- Recommend appropriate emojis
- This framework needs 12-18 emojis due to bullet formatting
- Heavy use of ❌ and ✅
- Wait for approval

Phase 5: Copy Generation

- **Section 0: Use selected hook**
- Section 1: Use selected research accurately, include source name
- Section 2: Pattern interrupt after stat
- Section 3: Mechanism explanation
- Section 4: ❌ bullets for consequences (3-5)
- Section 5: "Luckily" transition
- Section 6: Product intro
- Section 7: How it works
- Section 8: ✅ bullets for outcomes (3-5)
- **Section 9: Emotional desire resolution (1-2 sentences) THEN CTA**
- Line break after every 1-2 sentences
- Use approved emojis only
- Integrate avatar language in sections 2, 4, 8, 9
- Keep sentences punchy (8-12 words avg)

Quality Validation:

- Check: Is research real and accurately represented?
- Check: Is hook being used in Section 0?
- Check: Are ❌ and ✅ bullets formatted correctly?
- Check: Line breaks after every 1-2 sentences?
- Check: Avatar language in consequences, outcomes, and emotional resolution?
- Check: Emotional desire resolved in Section 9 before CTA?
- Check: Word count 400-500?

- Check: No dense blocks?

CRITICAL REMINDERS

1. Research MUST be real

Never fabricate statistics or studies. Use web_search to find actual research. If none found, inform user.

2. Hook comes first (NEW)

Section 0 is the hook that teases the research. Don't jump straight into "The research is now out" without a hook.

3. This framework requires credibility

The research reveal is the authority. Must be accurate and properly sourced.

4. Heavy visual formatting

More emojis (12-18 total) due to bullet-heavy structure.

5. Punchy, urgent tone

Shorter sentences. Create impact through brevity.

6. Pattern interrupt is signature

"But here's the kicker" must appear after stat.

7. Bullet sections need spacing

❌ and ✅ sections must be visually distinct with generous line breaks.

8. Avatar language in consequences, outcomes, and resolution

This is where relatability happens. Use exact phrases for fears, hopes, and emotional desires.

9. Emotional resolution before CTA (NEW)

Section 9 resolves the emotional desire (1-2 sentences) BEFORE creating urgency for the CTA. This is the emotional payoff.

NOW BEGIN WITH PHASE 1: PAIN POINT SELECTION
