[ATTACH MACRO AVATAR SHEET OUTPUT]

[ATTACH MACRO AVATAR LANGUAGE BANK OUTPUT]

WHAT THIS FRAMEWORK DOES

Generates short-form ad copy (450-550 words) using "The Shocking Confession" framework.

This framework opens with a controversial/shocking statement that creates pattern interrupt, then validates the reader's skepticism before explaining why it works.

Structure: 0. Hook (1-2 sentences)

1. Controversial statement/confession (1-2 sentences)
2. Acknowledge the reaction (2-3 sentences)
3. "And honestly? I get it." validation

4. Numbered list of reasons/benefits (5-7 items)
5. "But here's the thing..." transition
6. What didn't work before (backstory)
7. Product introduction as solution
8. How it works
9. Personal proof
10. Emotional desire resolution + CTA

Total length: 450-550 words

Optimized for Facebook/Instagram: Pattern interrupt opening, heavy line breaks, strategic emojis.

PHASE 1: PAIN POINT SELECTION

First, I'll analyze your Macro Avatar sheet and extract all the pain points.

OUTPUT:

=== PAIN POINTS IDENTIFIED ===

Based on your Macro Avatar sheet, here are the primary pain points:

1. [Pain point from avatar sheet]

    - Emotional intensity: [X/5 based on language bank]
    - Primary emotion: [Fear/Frustration/Anxiety/Guilt]
    - Core desire behind this pain: [What they emotionally want]
    - Language bank coverage: [Strong/Moderate/Light]
    - Confession potential: [High/Medium/Low - can this pain point be addressed with a shocking/controversial approach?]
2. [Pain point from avatar sheet]

    - Emotional intensity: [X/5]
    - Primary emotion: [Fear/Frustration/Anxiety/Guilt]
    - Core desire behind this pain: [What they emotionally want]
    - Language bank coverage: [Strong/Moderate/Light]
    - Confession potential: [High/Medium/Low]
3. [Pain point from avatar sheet]

    - Emotional intensity: [X/5]
    - Primary emotion: [Fear/Frustration/Anxiety/Guilt]

    - Core desire behind this pain: [What they emotionally want]
    - Language bank coverage: [Strong/Moderate/Light]
    - Confession potential: [High/Medium/Low]
4. [Pain point from avatar sheet]

    - Emotional intensity: [X/5]
    - Primary emotion: [Fear/Frustration/Anxiety/Guilt]
    - Core desire behind this pain: [What they emotionally want]
    - Language bank coverage: [Strong/Moderate/Light]
    - Confession potential: [High/Medium/Low]

[Continue for all pain points found in avatar sheet, typically 3-7 total]

👉 SELECT THE PAIN POINT FOR THIS AD: Type the number (1-7)

PHASE 2: CONFESSION GENERATION

Now I'll generate shocking/controversial confession statements related to this pain point.

OUTPUT:

=== CONFESSION GENERATION ===

Pain Point Being Addressed: [The selected pain point]

Core Emotional Desire: [What they emotionally want]

Primary Emotion: [Fear/Frustration/Anxiety/Guilt]

I'll generate 8 confession/shocking statement options that will create pattern interrupt.

CONFESSION REQUIREMENTS:

- Controversial or counterintuitive enough to stop the scroll
- Related to solving the pain point in an unexpected way
- Should make them think "wait, what?" or "are you serious?"
- Must be something you can validate/explain (not just shock for shock's sake)

- Broad enough for cold traffic
- Uses "I" voice (personal confession)

CONFESSION OPTIONS:

CONFESSION #1: "[Confession statement]"

- Why it's shocking: [What makes this controversial/unexpected]
- Why it works for this pain point: [How it connects]
- Validation angle: [How you'll validate their skepticism]

CONFESSION #2: "[Confession]"

- Why it's shocking: [Explanation]
- Why it works for this pain point: [Connection]
- Validation angle: [How to address skepticism]

CONFESSION #3: "[Confession]"

- Why it's shocking: [Explanation]
- Why it works for this pain point: [Connection]
- Validation angle: [How to address skepticism]

CONFESSION #4: "[Confession]"

- Why it's shocking: [Explanation]
- Why it works for this pain point: [Connection]
- Validation angle: [How to address skepticism]

CONFESSION #5: "[Confession]"

- Why it's shocking: [Explanation]
- Why it works for this pain point: [Connection]
- Validation angle: [How to address skepticism]

CONFESSION #6: "[Confession]"

- Why it's shocking: [Explanation]
- Why it works for this pain point: [Connection]
- Validation angle: [How to address skepticism]

CONFESSION #7: "[Confession]"

- Why it's shocking: [Explanation]

- Why it works for this pain point: [Connection]
- Validation angle: [How to address skepticism]

CONFESSION #8: "[Confession]"

- Why it's shocking: [Explanation]
- Why it works for this pain point: [Connection]
- Validation angle: [How to address skepticism]

TOP 3 RECOMMENDED:

→ Confession #[X] - [Why this creates best pattern interrupt for this avatar] → Confession #[X] - [Why this works well] → Confession #[X] - [Why this is effective]

👉 SELECT YOUR CONFESSION: Type the number (1-8)

OR

Type "YOUR OWN: [your confession]" if you have a different one

Once selected, type "CONTINUE”

PHASE 3: PAIN POINT LANGUAGE EXTRACTION

Now I'll extract the exact language your avatar uses for this pain point.

OUTPUT:

=== PAIN POINT LANGUAGE EXTRACTION ===

Pain Point Being Addressed: [The selected pain point]

Core Emotional Desire: [What they want emotionally]

Confession Selected: "[The confession]"

Hook Selected: "[The hook]"

Avatar's Exact Language (From Language Bank):

Primary phrases (use in list and throughout):

- "[Exact phrase from language bank]" from [Section name]
- "[Exact phrase from language bank]" from [Section name]
- "[Exact phrase from language bank]" from [Section name] [3-5 phrases total]

Failed solution phrases (use in backstory section):

- "[Exact phrase about what didn't work]" from [Section name]
- "[Exact phrase about what didn't work]" from [Section name] [2-3 phrases total]

Transformation phrases (use for benefits/outcomes):

- "[Exact phrase about desired outcome]" from [Section name]
- "[Exact phrase about transformation]" from [Section name] [2-3 phrases total]

Desire resolution phrases (use for emotional resolution):

- "[Exact phrase about what they want emotionally]" from [Section name]
- "[Exact phrase about desired state]" from [Section name] [2-3 phrases about relief, peace, control, confidence]

Emotional Tone: [Primary emotion: Fear/Frustration/Anxiety/Guilt]

Intensity Level: [X/5]

👉 Type "CONTINUE TO EMOJI SELECTION"

PHASE 4: EMOJI STRATEGY

Now I'll analyze your product, avatar, and pain point to recommend contextually appropriate emojis.

OUTPUT:

=== EMOJI RECOMMENDATIONS ===

Context Analysis:

Product category: [Category] Avatar demographics: [Gender, age range, key characteristics] Pain point emotion: [Primary emotion] Framework: Shocking Confession (requires relatability + conversational tone)

Recommended Emoji Set for This Ad:

For Benefits (3-5 options): ✅ [Checkmark - universal] [Emoji] - [Why this makes sense for this context] [Emoji] - [Why this makes sense for this context] [Emoji] - [Why this makes sense for this context]

For Problems/Negatives (2-3 options): ❌ [X mark - universal] [Emoji] - [Why this makes sense for this context] [Emoji] - [Why this makes sense for this context]

For Transformation/Results (2-3 options): ✨ [Sparkles - universal transformation] [Emoji] - [Why this makes sense for this context] [Emoji] - [Why this makes sense for this context]

For Product Emphasis (1-2 options): [Emoji] - [Why this makes sense for this context] [Emoji] - [Why this makes sense for this context]

For CTA (1-2 options): 👉 [Pointing finger - universal] [Emoji] - [Why this makes sense for this context]

Total Emoji Budget: 8-15 emojis across the entire ad

This framework uses moderate emoji count (similar to Experienced Owner).

Example Placement Strategy:

- Section 0 (Hook): 0-1 emojis
- Section 1 (Confession): 0 emojis (let words create shock)
- Section 2 (Reaction acknowledgment): 0-1 emojis
- Section 4 (List): Number emojis (1️⃣2️⃣3️⃣) + 2-3 benefit emojis
- Section 6 (Backstory): 1-2 problem emojis
- Section 7 (Product): 1 product emphasis emoji
- Section 10 (CTA): 1 CTA emoji

👉 APPROVE EMOJI STRATEGY: Type "APPROVED" to use these emojis Type "MODIFY: [your changes]" to adjust Type "MINIMAL EMOJIS" to only use ✅ ❌ ✨ 👉

Once approved, type "GENERATE COPY"

PHASE 5: COPY GENERATION

Now I'll generate the complete ad using the shocking confession framework.

CRITICAL WRITING RULES

1. AVATAR LANGUAGE IS EVERYTHING

Use exact phrases from language bank throughout:

- In the numbered list (benefits)
- In backstory (failed solutions)
- In outcomes (transformation)
- In emotional resolution

2. SENTENCE STRUCTURE

Average sentence length: 8-12 words.

Mix short and slightly longer for natural rhythm.

Use conversational transitions:

- "And honestly? I get it."
- "But here's the thing..."
- "Here's why..."
- "The problem was..."

3. FORMATTING FOR FACEBOOK/INSTAGRAM

Line Breaks:

- Break after every 1-2 sentences
- Create white space
- Mobile-first

Emoji Usage:

- Use ONLY approved emojis
- Total: 8-15 emojis
- Strategic placement

Paragraph Structure:

- 1-2 sentences per paragraph MAX
- Line breaks for rhythm

4. THE NUMBERED LIST

Each item gets number emoji (1️⃣ 2️⃣ 3️⃣).

Each item: 2-3 sentences MAX.

Keep benefit-focused and distinct.

5. PATTERN INTERRUPT STRUCTURE

Section 1 must be shocking/controversial enough to stop scroll.

Section 2 must acknowledge their skepticism ("And every time, I get the look").

Section 3 must validate them ("And honestly? I get it.").

This builds trust before explaining why it works.

6. CONVERSATIONAL TONE

This framework is MORE conversational than Research Reveal.

Less formal. More like talking to a friend.

"I get it." "Here's why." "The problem was..."

7. EMOTIONAL DESIRE RESOLUTION

In Section 10, after personal proof and before CTA, include 1-2 sentences resolving the core emotional desire.

Use desire resolution phrases from language bank.

COPY OUTPUT

=== THE SHOCKING CONFESSION AD ===

TARGETING REMINDER: Avatar: [Identifier] Pain Point: [The specific pain being addressed] Core Emotional Desire: [What they emotionally want] Emotional Tone: [Primary emotion] Intensity: [X/5] Confession: "[The confession]" Hook: "[The hook]" Emoji Strategy: [Approved emoji set]

SECTION 0: HOOK

[The selected hook - 1-2 sentences]

[Line break after each sentence if multi-sentence]

Word count target: 15-30 words

Formatting: Sets up the confession without revealing it.

SECTION 1: CONFESSION/SHOCKING STATEMENT

[The confession - 1-2 sentences]

[Line break]

[Optional context sentence if needed]

Word count target: 20-40 words

Formatting: Let the shock speak. No emojis here.

SECTION 2: ACKNOWLEDGE THE REACTION

[Describe their likely reaction - 2-3 sentences]

[Use sensory details: "Wide eyes. Raised eyebrows. That 'Are you serious?' face."]

[Line break after every 1-2 sentences]

Word count target: 30-50 words

Formatting: Make them feel seen. You know they're skeptical.

SECTION 3: VALIDATION

[Validate their skepticism - 2-3 sentences]

[MUST include "And honestly? I get it." or very similar]

[Explain why skepticism makes sense]

[Line break]

[Transition to why you do it anyway]

Word count target: 40-60 words

Formatting: Build trust through validation.

SECTION 4: THE LIST

[Transition complete from Section 3, jump into list]

[Line break]

1️⃣ **[Benefit/Reason Title]**

[2-3 sentences explaining this benefit] [Use avatar language from language bank] [Keep conversational]

[Line break]

2️⃣ **[Benefit/Reason Title]**

[2-3 sentences] [Different angle]

[Line break]

3️⃣ **[Benefit/Reason Title]**

[2-3 sentences] [Different angle]

[Line break]

4️⃣ **[Benefit/Reason Title]**

[2-3 sentences] [Different angle]

[Line break]

5️⃣ **[Benefit/Reason Title]**

[2-3 sentences] [Different angle]

[Line break]

[Optional 6️⃣ and 7️⃣ if strongly supported]

Word count target: 200-280 words

Formatting: Each item distinct, scannable, conversational.

SECTION 5: TRANSITION TO BACKSTORY

[Transition: "But here's the thing..." or "The problem was..."]

[Line break]

[1-2 sentences setting up the backstory]

Word count target: 20-30 words

Formatting: Bridge from benefits to problem with existing solutions.

SECTION 6: BACKSTORY (WHAT DIDN'T WORK)

[What you tried that didn't work - use failed solution phrases from language bank]

[Line break after 1-2 sentences]

[Why it was bad - be specific about the problems]

[Line break after 1-2 sentences]

[Optional emoji for emphasis]

[Personal impact of failure - emotional consequence]

Word count target: 50-70 words

Formatting: Line break after every 1-2 sentences. Build frustration using avatar's language.

EXAMPLE FORMATS (DIFFERENT NICHES):

For cat water fountain:

> I tried everything first.
>
> Watering down his food. Making it into a soupy mess every meal.
>
> He'd just walk away. Half the time he wouldn't even touch it.
>
> And that just made my anxiety worse.

For knee pain cream:

> I've tried every cream at the pharmacy.
>
> Some burned. Some smelled terrible. Most did absolutely nothing.
>
> I'd wake up in the same pain, wondering if this is just how life would be now.

For baby sleep training:

> I bought every book. Tried every method.
>
> Cry it out? Felt cruel. Co-sleeping? Wasn't working. Wake windows? Couldn't figure them out.
>
> I was exhausted, frustrated, and desperate.

For ergonomic chair:

> I bought cheaper "ergonomic" chairs before.
>
> Uncomfortable after an hour. Padding flattened within weeks. Adjustments that barely moved.
>
> My back still hurt. My posture got worse.

SECTION 7: PRODUCT INTRODUCTION

[Transition: "So I created one myself" or "That's when I found..." or "So I switched to..." or "Then I discovered..."]

[Line break]

[Product name + what it is]

[Line break]

[Key differentiator that solves what failed solutions couldn't]

[Line break]

[Optional product emoji]

Word count target: 40-60 words

Formatting: Line breaks. Natural discovery or creation story.

EXAMPLE FORMATS (DIFFERENT NICHES):

For cat water fountain:

> That's when I found Purrify.
>
> It's a cat water fountain designed to trigger their natural drinking instinct.
>
> The difference? Flowing water that actually appeals to cats — no force-feeding required.

For knee pain cream:

> Then I discovered ArthriEase.
>
> A natural pain relief cream developed specifically for joint pain.
>
> Unlike pharmacy brands, it penetrates deep without the burn or smell.

For baby sleep training:

> That's when I found the Gentle Sleep Method.
>
> A step-by-step course designed for exhausted parents who don't want to let their baby cry it out.
>
> The difference? It works with your baby's natural rhythms, not against them.

For ergonomic chair:

> So I invested in the FlexCore Pro.

An ergonomic office chair built for people who sit 8+ hours a day.

The difference? Medical-grade lumbar support and adjustments that actually hold.

SECTION 8: HOW IT WORKS

[Key feature 1 with benefit - 1 sentence]

[Line break]

[Key feature 2 with benefit - 1 sentence]

[Line break]

[Key feature 3 with benefit - 1 sentence]

[Line break]

[Why these matter for solving the original problem - 1 sentence]

Word count target: 40-60 words

Formatting: Each feature gets own line. Keep simple. Show how features solve the failed solutions from Section 6.

EXAMPLE FORMATS (DIFFERENT NICHES):

For cat water fountain:

Multi-stage filtration keeps water fresh all day.

The gentle flow mimics running water that cats are drawn to.

Holds enough water for days, so you're not constantly refilling.

Your cat drinks more without you having to worry about it.

For knee pain cream:

Natural anti-inflammatory compounds reduce swelling at the source.

Fast-absorbing formula penetrates deep into joints.

No harsh chemicals or burning sensation.

You get real relief without the side effects.

For baby sleep training:

Customized sleep plans based on your baby's age and temperament.

Step-by-step video guides you can follow at your own pace.

24/7 access to sleep consultants when you get stuck.

Your baby learns to sleep — gently, without trauma.

For ergonomic chair:

4D lumbar support adjusts to your spine's natural curve.

Memory foam seat that doesn't flatten over time.

Fully adjustable armrests, seat depth, and recline tension.

You sit comfortably for hours without pain.

SECTION 9: PERSONAL PROOF

[Personal result or usage - 2-3 sentences]

[Include emotional proof, not just functional]

[Line break after every 1-2 sentences]

Word count target: 30-50 words

Formatting: Make it real and personal.

EXAMPLE FORMATS (DIFFERENT NICHES):

For cat water fountain:

My cat drinks 3x more water now than he ever did from a bowl.

And I finally sleep through the night. No more waking up anxious, wondering if he's hydrated enough.

For knee pain cream:

I use it every morning before my walk.

For the first time in years, I'm not wincing with every step. I feel like myself again.

For baby sleep training:

My daughter now sleeps 11 hours straight.

And I'm no longer the exhausted, irritable mom I was becoming. We're both happier.

For ergonomic chair:

I've been using it for 6 months now.

My back pain is gone. I don't dread sitting down to work anymore.

SECTION 10: EMOTIONAL RESOLUTION + CTA

EMOTIONAL DESIRE RESOLUTION (CRITICAL):

[1-2 sentences resolving the core emotional desire using desire resolution phrases from language bank]

[Line break]

[Call to action - 1 sentence]

[Line break]

[CTA emoji] [Action statement]

[Line break]

[Risk reversal - 1 sentence]

[Line break]

[URL]

Word count target: 40-60 words

Formatting: Emotional resolution first, then CTA.

EXAMPLE FORMATS (DIFFERENT NICHES):

For cat water fountain:

And you can finally stop living in constant fear that something's wrong.

👉 See how Purrify helps at [URL]

30-day money-back guarantee.

[URL]

For knee pain cream:

And you can stop feeling like your body is betraying you.

👉 Try ArthriEase risk-free at [URL]

Full refund if it doesn't work for you.

[URL]

For baby sleep training:

And you can stop feeling like you're failing as a parent.

👉 Start the Gentle Sleep Method today at [URL]

60-day guarantee — if your baby isn't sleeping better, full refund.

[URL]

For ergonomic chair:

And you can stop dreading every workday because of back pain.

👉 Get the FlexCore Pro at [URL]

90-day trial period. Return it if it doesn't help.

==========

📊 COPY METADATA

Total Word Count: [X words - should be 450-550]

Confession Used: "[The confession]"

- Shock factor: [High/Medium - should be high]

Hook Used: "[The hook]"

- Pattern: [Which pattern]

Avatar Language Integration:

Section 0 (Hook):

- "[Exact phrase if used]" from [Language Bank Section]

Section 3 (Validation):

- "[Exact phrase if used]" from [Language Bank Section]

Section 4 (The List):

- "[Exact phrase used]" from [Language Bank Section]
- "[Exact phrase used]" from [Language Bank Section]
- "[Exact phrase used]" from [Language Bank Section]

Section 6 (Backstory):

- "[Exact phrase used]" from [Language Bank Section]
- "[Exact phrase used]" from [Language Bank Section]

Section 8 (How It Works):

- "[Exact phrase used]" from [Language Bank Section]

Section 9 (Personal Proof):

- "[Exact phrase used]" from [Language Bank Section]

Section 10 (Emotional Resolution):

- "[Exact phrase used for emotional resolution]" from [Language Bank Section]

Total phrases used: [X - should be 10-14]

Sentence Structure Analysis:

- Average sentence length: [X words - should be 8-12]
- Longest sentence: [X words]
- Shortest sentence: [X words]
- Rhythm: [Should feel conversational and natural]

Formatting Analysis:

Line Breaks:

- Total line breaks: [X - should be 20-30]
- Average sentences per paragraph: [X - should be 1-2]
- Dense blocks: [X - should be 0]

Emoji Usage:

- Total emojis: [X - should be 8-15]
- Number emojis in list: [X]
- Benefit/problem emojis: [X]
- Product emphasis: [X]
- CTA emoji: [X]
- All from approved set: [Yes/No]

Mobile Readability:

- Scannability: [High/Medium/Low - should be High]
- White space: [Generous/Adequate - should be Generous]
- Conversational tone: [Yes/No - should be Yes]

Emotional Resolution:

- Core desire addressed: [Yes/No]
- Uses desire resolution phrases: [Yes/No]
- Feels like emotional payoff: [Yes/No]

✓ QUALITY CHECKLIST

Pattern Interrupt: ✓ Hook sets up confession (Section 0) ✓ Confession is shocking/controversial (Section 1) ✓ Reaction acknowledged (Section 2) ✓ Skepticism validated (Section 3 with "And honestly? I get it.") ✓ Creates trust before explaining

Framework Structure: ✓ Hook opens (Section 0) ✓ Confession/shocking statement (Section 1) ✓ Acknowledge reaction (Section 2) ✓ Validate skepticism (Section 3) ✓ Numbered list of benefits (Section 4) ✓ Transition to backstory (Section 5) ✓ What didn't work (Section 6) ✓ Product introduction (Section 7) ✓ How it works (Section 8) ✓ Personal proof (Section 9) ✓ Emotional desire resolved (Section 10) ✓ CTA with risk reversal (Section 10)

Language Bank Integration: ✓ Avatar phrases in list ✓ Failed solution phrases in backstory ✓ Transformation phrases in outcomes ✓ Desire resolution phrases in Section 10 ✓ 10-14 exact phrases used naturally

Sentence Structure: ✓ Average 8-12 words per sentence ✓ Conversational rhythm ✓ Varied lengths ✓ Natural flow

Formatting: ✓ Line breaks after every 1-2 sentences ✓ NO dense blocks ✓ List items scannable ✓ Emojis from approved set ✓ Total emoji count: 8-15 ✓ Mobile-friendly

Emotional Resolution: ✓ Section 10 includes desire resolution ✓ Uses language bank phrases ✓ Addresses emotional want ✓ Feels like relief/permission ✓ Before CTA

Tone: ✓ Conversational (like talking to friend) ✓ Relatable (validates skepticism) ✓ Authentic (personal proof) ✓ Not formal or corporate

---

👉 USER ACTIONS:

Type "APPROVED" → Copy is ready

Type "REVISE [section name]" → Regenerate section

Type "MORE LINE BREAKS IN [section name]" → Add breathing room

Type "MORE AVATAR LANGUAGE IN [section name]" → Add phrases

Type "STRENGTHEN EMOTIONAL RESOLUTION" → Make desire resolution more impactful

Type "ADJUST TONE TO [direction]" → Make it more [urgent/casual/empathetic/etc]

Type "DIFFERENT CONFESSION" → Go back to Phase 2

Type "DIFFERENT HOOK" → Go back to Phase 3

Type "DIFFERENT EMOJIS" → Go back to Phase 5

Type "NEW PAIN POINT" → Go back to Phase 1

SYSTEM INSTRUCTIONS FOR CLAUDE

When executing this prompt:

Phase 1: Pain Point Selection

- Extract all pain points from avatar sheet
- For each, identify core emotional desire
- Assess confession potential (can this be addressed with shocking/controversial angle?)
- Present numbered list
- Wait for selection

Phase 2: Confession Generation

- Generate 8 confession/shocking statement options
- Each must be controversial enough to stop scroll
- Each must be validatable (not just shock for shock)
- Use "I" voice (personal)
- Recommend top 3
- Wait for selection

Phase 3: Hook Generation

- Generate 8 hooks that set up confession without revealing it
- Create curiosity
- Tap into emotion
- Use avatar language when possible
- Recommend top 3
- Wait for selection

Phase 4: Language Extraction

- Extract avatar phrases: primary, failed solutions, transformation, desire resolution
- Pull exact phrases word-for-word
- Find 2-3 desire resolution phrases
- Wait for continuation

Phase 5: Emoji Strategy

- Analyze context
- Recommend appropriate emojis
- Moderate count (8-15 total)
- Wait for approval

Phase 6: Copy Generation

- Section 0: Use selected hook
- Section 1: Use selected confession (no emojis)
- Section 2: Acknowledge reaction (sensory details)
- Section 3: Validate with "And honestly? I get it."
- Section 4: Numbered list (5-7 items, 2-3 sentences each)
- Section 5: Transition to backstory
- Section 6: Failed solutions using language bank
- Section 7: Product intro
- Section 8: How it works (features + benefits)
- Section 9: Personal proof (emotional + functional)
- Section 10: Emotional desire resolution THEN CTA
- Line break after every 1-2 sentences
- Use approved emojis only
- Integrate avatar language throughout
- Keep conversational (8-12 words avg per sentence)

Quality Validation:

- Check: Is confession shocking enough?
- Check: Is skepticism validated in Section 3?
- Check: Line breaks after every 1-2 sentences?
- Check: Avatar language in list, backstory, resolution?
- Check: Emotional desire resolved before CTA?
- Check: Word count 450-550?
- Check: No dense blocks?
- Check: Conversational tone throughout?

CRITICAL REMINDERS

1. Confession must create pattern interrupt

Not mildly interesting. Actually shocking or controversial enough to stop scroll.

2. Validate skepticism immediately

Section 3 MUST include "And honestly? I get it." or very similar. This builds trust.

3. Conversational tone is essential

More casual than Research Reveal. Like talking to a friend.

4. Avatar language in failed solutions

Section 6 is critical for relatability. Use exact phrases about what didn't work.

5. Emotional resolution before CTA

Section 10 resolves emotional desire first, then drives action.

6. Examples show niche diversity

Sections 6-10 include examples across multiple niches to show versatility.

7. Personal proof creates authenticity

Section 9 should feel real and vulnerable, not corporate.

NOW BEGIN WITH PHASE 1: PAIN POINT SELECTION
