[ATTACH MACRO AVATAR SHEET OUTPUT]

[ATTACH MACRO AVATAR LANGUAGE BANK OUTPUT]

WHAT THIS FRAMEWORK DOES

Generates medium-form ad copy (500-700 words) using "The Diagnostic Checklist" framework.

This framework opens with numbered signs/symptoms that let the reader self-diagnose, then reveals the root cause and solution.

Structure: 0. Hook with self-diagnosis prompt (1-2 sentences)

1. Numbered signs/symptoms list (3-5 signs, each with mini-story)
2. "If you have even ONE sign..." transition
3. Root cause reveal (what's actually happening)

4. Mechanism explanation (the science/reason behind it)
5. Consequences with ❌ bullets if left unaddressed
6. "I discovered the fix" transition
7. Product introduction
8. How it works
9. Social proof (what users report)
10. Emotional desire resolution + CTA

Total length: 500-700 words

Optimized for Facebook/Instagram: Self-diagnosis hook, numbered signs with stories, heavy line breaks.

PHASE 1: PAIN POINT SELECTION

First, I'll analyze your Macro Avatar sheet and extract all the pain points.

OUTPUT:

=== PAIN POINTS IDENTIFIED ===

Based on your Macro Avatar sheet, here are the primary pain points:

1. [Pain point from avatar sheet]

    - Emotional intensity: [X/5 based on language bank]
    - Primary emotion: [Fear/Frustration/Anxiety/Guilt]
    - Core desire behind this pain: [What they emotionally want]
    - Language bank coverage: [Strong/Moderate/Light]
    - Diagnostic potential: [High/Medium/Low - can this pain point manifest as multiple identifiable signs/symptoms?]
2. [Pain point from avatar sheet]

    - Emotional intensity: [X/5]
    - Primary emotion: [Fear/Frustration/Anxiety/Guilt]
    - Core desire behind this pain: [What they emotionally want]
    - Language bank coverage: [Strong/Moderate/Light]
    - Diagnostic potential: [High/Medium/Low]
3. [Pain point from avatar sheet]

    - Emotional intensity: [X/5]
    - Primary emotion: [Fear/Frustration/Anxiety/Guilt]

    - Core desire behind this pain: [What they emotionally want]
    - Language bank coverage: [Strong/Moderate/Light]
    - Diagnostic potential: [High/Medium/Low]
4. [Pain point from avatar sheet]

    - Emotional intensity: [X/5]
    - Primary emotion: [Fear/Frustration/Anxiety/Guilt]
    - Core desire behind this pain: [What they emotionally want]
    - Language bank coverage: [Strong/Moderate/Light]
    - Diagnostic potential: [High/Medium/Low]

[Continue for all pain points found in avatar sheet, typically 3-7 total]

👉 SELECT THE PAIN POINT FOR THIS AD: Type the number (1-7)

PHASE 2: SIGNS/SYMPTOMS GENERATION

Now I'll generate identifiable signs/symptoms that indicate this pain point is present.

OUTPUT:

=== SIGNS/SYMPTOMS GENERATION ===

Pain Point Being Addressed: [The selected pain point]

Core Emotional Desire: [What they emotionally want]

Primary Emotion: [Fear/Frustration/Anxiety/Guilt]

I'll generate 5-7 identifiable signs/symptoms that show this pain point is affecting them.

SIGNS/SYMPTOMS REQUIREMENTS:

- Observable/identifiable (they can self-diagnose)
- Specific enough to create "yes, that's me" reaction
- Each sign should be distinct (not repetitive)
- Should escalate in intensity or specificity

- Can be physical, emotional, behavioral, or situational
- Should use avatar language when possible

SIGN/SYMPTOM OPTIONS:

SIGN #1: "[Description of sign/symptom]"

- Why it's identifiable: [How they'll recognize this in themselves]
- Connection to pain point: [How this manifests from the pain point]
- Avatar language used: [Which phrases from language bank]

SIGN #2: "[Description]"

- Why it's identifiable: [Recognition factor]
- Connection to pain point: [Manifestation]
- Avatar language used: [Phrases]

SIGN #3: "[Description]"

- Why it's identifiable: [Recognition factor]
- Connection to pain point: [Manifestation]
- Avatar language used: [Phrases]

SIGN #4: "[Description]"

- Why it's identifiable: [Recognition factor]
- Connection to pain point: [Manifestation]
- Avatar language used: [Phrases]

SIGN #5: "[Description]"

- Why it's identifiable: [Recognition factor]
- Connection to pain point: [Manifestation]
- Avatar language used: [Phrases]

[Optional SIGN #6 and #7 if strongly supported by avatar research]

RECOMMENDED SIGNS TO USE:

Based on language bank intensity and avatar research, I recommend using signs #[X, X, X] for the strongest self-diagnosis effect.

These create the best "yes, that's me" recognition while covering different manifestations of the pain point.

👉 APPROVE SIGNS SELECTION: Type "APPROVED" to use recommended signs

OR

Type "USE: [list numbers]" to select specific signs (e.g., "USE: 1, 3, 4, 5")

Once approved, type "CONTINUE TO LANGUAGE EXTRACTION"

PHASE 3: PAIN POINT LANGUAGE EXTRACTION

Now I'll extract the exact language your avatar uses for this pain point and these signs.

OUTPUT:

=== PAIN POINT LANGUAGE EXTRACTION ===

Pain Point Being Addressed: [The selected pain point]

Signs Selected: [List the selected signs]

Core Emotional Desire: [What they emotionally want]

Avatar's Exact Language (From Language Bank):

Sign-specific phrases (already integrated in signs above):

- "[Exact phrase from language bank]" from [Section name]
- "[Exact phrase from language bank]" from [Section name]
- "[Exact phrase from language bank]" from [Section name] [3-5 phrases already used in sign descriptions]

Root cause phrases (use for cause reveal section):

- "[Exact phrase about cause]" from [Section name]
- "[Exact phrase about mechanism]" from [Section name] [2-3 phrases total]

Consequence phrases (use for ❌ bullets):

- "[Exact phrase about consequences]" from [Section name]
- "[Exact phrase about consequences]" from [Section name] [3-4 phrases total]

Transformation phrases (use for social proof):

- "[Exact phrase about relief/outcome]" from [Section name]
- "[Exact phrase about change]" from [Section name] [2-3 phrases total]

Desire resolution phrases (use for emotional resolution):

- "[Exact phrase about what they want emotionally]" from [Section name]
- "[Exact phrase about desired state]" from [Section name] [2-3 phrases about relief, peace, control, clarity]

Emotional Tone: [Primary emotion: Fear/Frustration/Anxiety/Guilt]

Intensity Level: [X/5]

👉 Type "CONTINUE TO EMOJI SELECTION"

PHASE 4: EMOJI STRATEGY

Now I'll analyze your product, avatar, and pain point to recommend contextually appropriate emojis.

OUTPUT:

=== EMOJI RECOMMENDATIONS ===

Context Analysis:

Product category: [Category] Avatar demographics: [Gender, age range, key characteristics] Pain point emotion: [Primary emotion] Framework: Diagnostic Checklist (self-assessment focused, educational tone)

Recommended Emoji Set for This Ad:

For Consequences/Negatives (3-5 options): ❌ [X mark - universal] [Emoji] - [Why this makes sense for this context] [Emoji] - [Why this makes sense for this context] [Emoji] - [Why this makes sense for this context]

For Product/Solution (1-2 options): [Emoji] - [Why this makes sense for this context] [Emoji] - [Why this makes sense for this context]

For Transformation/Relief (2-3 options): ✨ [Sparkles - universal transformation] [Emoji] - [Why this makes sense for this context] [Emoji] - [Why this makes sense for this context]

For Social Proof (1-2 options): ⭐ [Star - testimonial related] [Emoji] - [Why this makes sense for this context]

For CTA (1-2 options): 👉 [Pointing finger - universal] [Emoji] - [Why this makes sense for this context]

Total Emoji Budget: 10-16 emojis across the entire ad

This framework uses moderate-to-heavy emoji count due to numbered signs and ❌ consequences section.

Example Placement Strategy:

- Section 0 (Hook): 0-1 emojis
- Section 1 (Signs list): Number emojis only 1️⃣2️⃣3️⃣ etc) - no additional emojis here
- Section 5 (Consequences): 3-5 ❌ bullets
- Section 7 (Product): 1 product emoji
- Section 9 (Social proof): 2-3 ⭐ or testimonial emojis
- Section 10 (CTA): 1 CTA emoji

👉 APPROVE EMOJI STRATEGY: Type "APPROVED" to use these emojis Type "MODIFY: [your changes]" to adjust Type "MINIMAL EMOJIS" to only use numbers, ❌, ⭐, 👉

Once approved, type "GENERATE COPY"

PHASE 5: COPY GENERATION

Now I'll generate the complete ad using the diagnostic checklist framework.

CRITICAL WRITING RULES

1. SELF-DIAGNOSIS IS THE HOOK

Section 0 must invite them to self-assess.

Not "here are signs" but "do you have these signs?"

Creates engagement through self-recognition.

2. EACH SIGN GETS A MINI-STORY

Section 1: Each numbered sign includes 2-4 sentences with:

- The sign itself
- A brief story/example showing how it manifests
- Emotional impact

Uses avatar language from language bank.

3. AVATAR LANGUAGE IS EVERYTHING

Use exact phrases throughout:

- In sign descriptions
- In root cause reveal
- In consequences
- In social proof
- In emotional resolution

4. SENTENCE STRUCTURE

Average sentence length: 8-12 words.

Mix short and medium sentences.

Some single-word sentences for emphasis.

5. FORMATTING FOR FACEBOOK/INSTAGRAM

Line Breaks:

- Break after every 1-2 sentences

- Extra space between signs
- White space around ❌ consequences

Emoji Usage:

- Use ONLY approved emojis
- Total: 10-16 emojis
- Number emojis for signs (1️⃣2️⃣3️⃣)
- Heavy ❌ in consequences (3-5)

Paragraph Structure:

- 1-2 sentences per paragraph MAX
- Each sign gets its own section with spacing

6. ROOT CAUSE REVEAL

Section 3 must reveal what's ACTUALLY causing all these signs.

This is the "aha" moment.

Connect the dots between signs and underlying cause.

7. SOCIAL PROOF STRUCTURE

Section 9 shows what users report.

Use ⭐ or similar emoji for each testimonial snippet.

Keep testimonial snippets short (one sentence each).

8. EMOTIONAL DESIRE RESOLUTION

Section 10, after social proof and before CTA, includes 1-2 sentences resolving the core emotional desire.

Uses desire resolution phrases from language bank.

COPY OUTPUT

=== THE DIAGNOSTIC CHECKLIST AD ===

TARGETING REMINDER: Avatar: [Identifier] Pain Point: [The specific pain being addressed] Signs Used: [List of signs] Core Emotional Desire: [What they emotionally want] Emotional Tone: [Primary emotion] Intensity: [X/5] Emoji Strategy: [Approved emoji set]

SECTION 0: HOOK WITH SELF-DIAGNOSIS PROMPT

[Number] signs [your target audience description] [is experiencing this pain point]

[Line break]

[(X% have 2 or more) - optional stat if credible]

Word count target: 15-35 words

Formatting: Invites self-assessment. Optional emoji if approved.

EXAMPLE FORMATS (DIFFERENT NICHES):

For cat water fountain (kidney disease fear):

> 3 signs your senior cat isn't getting enough water
>
> (99% of cat owners miss #2)

For brain fog/cognitive decline:

> 5 signs your brain isn't getting enough oxygen at night

For aging skin concerns:

> 4 signs your skin is aging faster than it should

For entrepreneur burnout:

> 3 signs you're burning out (even if you don't realize it yet)

SECTION 1: NUMBERED SIGNS/SYMPTOMS LIST

[Each sign gets a number emoji + title + 2-4 sentence mini-story]

[Line break between each sign]

1️⃣ [Sign title]

[2-4 sentences with mini-story showing how this manifests] [Include emotional impact] [Use avatar language from language bank]

[Line break]

2️⃣ [Sign title]

[2-4 sentences]

[Line break]

3️⃣ [Sign title]

[2-4 sentences]

[Line break]

[4️⃣ and 5️⃣ if using 4-5 signs]

Word count target: 200-350 words (this is the longest section)

Formatting: Each sign distinct with spacing. Only number emojis used here.

EXAMPLE FORMATS (DIFFERENT NICHES):

For cat water fountain (kidney disease fear):

> 1️⃣ **You're constantly checking their water bowl**
>
> You walk by multiple times a day to see if the level's gone down. You're trying to gauge if they're drinking enough, but it's impossible to tell. The constant guesswork is exhausting.
>
> 2️⃣ **You're anxiously monitoring for symptoms**
>
> Every time they use the litter box, you're looking for changes. More frequent urination? Less? You're hypervigilant because you know kidney disease shows no early signs. By the time symptoms appear, it's often too late.
>
> 3️⃣ **You're adding water to their food**
>
> You've turned every meal into a soupy mess, hoping they'll get more hydration. Sometimes they eat it. Sometimes they walk away. And you're left wondering if you're doing enough.

For brain fog (sleep/oxygen):

1️⃣ **The word-finding struggle**

Mid-sentence, you freeze. "What's that word?" You know it. It's right there. But it escapes you. Names, places, common words—they all slip away more often than they used to.

2️⃣ **Afternoon mental shutdown**

By 2 PM, your brain feels like it's full. You can't think clearly anymore. Even simple decisions feel overwhelming. You're mentally exhausted but you still have hours left in your day.

3️⃣ **Forgetting why you entered rooms**

You walk into a room and just... blank. What were you doing? Why are you here? You stand there confused, trying to retrace your steps.

For aging skin:

1️⃣ **Your jawline isn't as defined as it used to be**

When you look in the mirror, things look... softer. Looser. You can see your face changing shape and there's nothing you can do about it.

2️⃣ **You wake up puffy no matter how much you sleep**

Eight hours of sleep. Still puffy. Your eyes look tired even when you're not. The inflammation just won't go away.

3️⃣ **Fine lines are turning into deep wrinkles**

Those smile lines that used to fade are now permanent creases. Your skin isn't bouncing back like it used to.

For entrepreneur burnout:

1️⃣ **You dread opening your laptop in the morning**

There was a time when you were excited to start your day. Now? You feel heavy just thinking about work. The passion is gone.

2️⃣ **You're irritable with everyone**

Your team. Your family. Everyone. Small things set you off. You know you're being unreasonable but you can't seem to control it.

3️⃣ **You can't remember the last time you felt accomplished**

You're always busy but never feel like you're making progress. Everything feels like maintenance, nothing feels like growth.

SECTION 2: TRANSITION

[Transition: "If you have even ONE sign..." or "If any of these sound familiar..."]

[Line break]

[What this means - 1-2 sentences]

Word count target: 20-40 words

Formatting: Bridge from self-diagnosis to cause reveal.

EXAMPLE FORMATS (DIFFERENT NICHES):

If you have even ONE of these signs...

Your cat isn't getting adequate hydration, and their kidneys are working overtime to compensate.

If any of these sound familiar...

Your brain isn't getting enough oxygen at night. And it's affecting every area of your life.

If you recognize yourself in these signs...

Your skin cells aren't getting the deep restorative sleep they need to regenerate properly.

If even one of these resonates...

You're burning out, and your body is trying to tell you something's wrong.

SECTION 3: ROOT CAUSE REVEAL

[What's ACTUALLY happening - reveal the underlying cause]

[Line break after every 1-2 sentences]

[Use avatar language when explaining cause]

Word count target: 50-70 words

Formatting: This is the "aha" moment. Make it clear and direct.

EXAMPLE FORMATS (DIFFERENT NICHES):

For cat water fountain:

> Here's what's actually happening.
>
> Cats have a naturally low thirst drive. They evolved to get moisture from prey, not from drinking.
>
> So they don't drink enough from still water bowls. Their kidneys have to work harder to concentrate urine.
>
> Over time, this puts chronic strain on their delicate renal system.

For brain fog:

> Here's the real problem.
>
> When you sleep with your mouth open, your tongue falls back. You get less oxygen.
>
> Your brain can't fully recharge. Toxins don't get flushed out properly.
>
> You're slowly starving your brain of the oxygen it needs to function.

For aging skin:

> Here's what's really happening.
>
> When you mouth breathe at night, you don't get deep restorative sleep.
>
> Your body doesn't produce enough collagen. Your lymphatic system slows down.
>
> Your skin can't repair itself properly, so it ages faster.

For entrepreneur burnout:

> Here's the truth.
>
> You're not lazy. You're not weak.
>
> Your nervous system is stuck in fight-or-flight mode. You're operating from cortisol and adrenaline 24/7.

Your body physically can't sustain this pace.

SECTION 4: MECHANISM EXPLANATION

[Explain the mechanism/science behind the cause - 2-3 sentences]

[Line break after every 1-2 sentences]

Word count target: 40-60 words

Formatting: Educational but accessible.

EXAMPLE FORMATS (DIFFERENT NICHES):

For cat water fountain:

> CKD is a progressive disease no matter what.
>
> But dehydration accelerates the damage. It forces the kidneys to work harder than they should.
>
> The earlier you address hydration, the better chance you have at slowing progression.

For brain fog:

> Nasal breathing delivers up to 18% more oxygen than mouth breathing.
>
> That oxygen fuels neural function, memory formation, and toxin clearance.
>
> Without it, your brain operates in a constant state of deficit.

For aging skin:

> Deep sleep is when your body produces growth hormone and collagen.
>
> It's when your cells regenerate and repair damage.
>
> Without deep sleep, your skin ages at an accelerated rate.

For entrepreneur burnout:

> Your nervous system has two modes: rest-and-digest or fight-or-flight.
>
> When you're chronically stressed, you're stuck in fight-or-flight.

Your body can't rest, recover, or think clearly in that state.

SECTION 5: CONSEQUENCES WITH ❌ BULLETS

[Transition: "If this continues unchecked..." or "Without addressing this..."]

[Line break]

❌ [Consequence 1 - use avatar language]

[Line break]

❌ [Consequence 2 - use avatar language]

[Line break]

❌ [Consequence 3 - use avatar language]

[Line break]

[Optional ❌ consequence 4 if supported]

[Line break]

[Summary impact statement - 1 sentence]

Word count target: 50-80 words

Formatting: Each ❌ bullet gets own line. Extra space before summary.

EXAMPLE FORMATS (DIFFERENT NICHES):

For cat water fountain:

> Without adequate hydration:
>
> ❌ The invisible threat of kidney disease continues to progress
>
> ❌ You're left with constant anxiety and guesswork about their water intake
>
> ❌ By the time symptoms appear, significant damage has already occurred
>
> And you're living in fear every single day.

For brain fog:

If this continues unchecked:

❌ Your memory and cognitive function continue to decline

❌ You feel older than you actually are

❌ Your brain fog becomes your new normal

❌ The damage becomes harder to reverse

And you start accepting that "this is just how it is now."

For aging skin:

Without addressing this:

❌ Your skin continues aging faster than it should

❌ Fine lines turn into deep wrinkles

❌ Your jawline continues to sag

And you look older than you feel.

For entrepreneur burnout:

If you don't address this:

❌ You'll eventually crash (physically or mentally)

❌ Your relationships will suffer

❌ The business you built will start to crumble

And you'll lose everything you've worked for.

SECTION 6: TRANSITION TO SOLUTION

["I discovered the fix" or "Here's what worked for me" or "There's a solution"]

[Line break]

[1 sentence about discovery/realization]

Word count target: 15-30 words

Formatting: Personal and hopeful.

EXAMPLE FORMATS:

> I discovered the fix.
>
> And it's simpler than you think.
>
> Here's what finally worked.
>
> After years of trying everything else.
>
> There's a solution.
>
> And it doesn't require massive life changes.

SECTION 7: PRODUCT INTRODUCTION

[Product name + what it is - 1-2 sentences]

[Line break]

[How it addresses the root cause from Section 3 - 1-2 sentences]

[Optional product emoji]

Word count target: 40-60 words

Formatting: Line breaks. Natural introduction.

EXAMPLE FORMATS (DIFFERENT NICHES):

For cat water fountain:

> I switched to Purrify — a cat water fountain designed to trigger their natural drinking instinct.
>
> The flowing water mimics running streams that cats are naturally drawn to.
>
> They drink more without you having to force it.

For brain fog:

> I started using NightBreathe — a gentle mouth tape designed to keep you breathing through your nose while you sleep.

It ensures your brain gets the oxygen it needs all night long.

You wake up with mental clarity instead of fog.

For aging skin:

I discovered SleepGlow — a silk sleep system that promotes deeper, more restorative sleep.

It helps your body get into the deep sleep stages where collagen production happens.

Your skin actually gets the chance to repair itself.

For entrepreneur burnout:

I started using RestOS — a nervous system reset program designed for high-performers.

It retrains your body to shift out of fight-or-flight mode.

You learn to rest without feeling guilty or anxious.

SECTION 8: HOW IT WORKS

[Key feature/mechanism 1 - 1 sentence]

[Line break]

[Key feature/mechanism 2 - 1 sentence]

[Line break]

[Key feature/mechanism 3 - 1 sentence]

[Line break]

[Why this solves the signs from Section 1 - 1 sentence]

Word count target: 40-60 words

Formatting: Simple and clear. Each feature gets own line.

SECTION 9: SOCIAL PROOF (WHAT USERS REPORT)

[Transition: "Here's what users report:" or "Women like you are noticing:"]

[Line break]

⭐ [Testimonial snippet 1 - one sentence, use transformation phrases from language bank]

[Line break]

⭐ [Testimonial snippet 2 - one sentence]

[Line break]

⭐ [Testimonial snippet 3 - one sentence]

[Line break]

[Social proof numbers - 1 sentence]

Word count target: 50-70 words

Formatting: Each testimonial snippet gets ⭐ and own line.

EXAMPLE FORMATS (DIFFERENT NICHES):

For cat water fountain:

> Here's what cat owners are reporting:
>
> ⭐ "I finally stopped obsessing over whether my cat is drinking enough water."
>
> ⭐ "My anxiety about kidney disease has dropped dramatically."
>
> ⭐ "I can see him drinking throughout the day now — no more guesswork."
>
> Over 15,000 senior cat owners are using Purrify.

For brain fog:

> Women like you are noticing:
>
> ⭐ "Like someone turned the lights on in my brain."
>
> ⭐ "I can remember everything again. It's miraculous."
>
> ⭐ "My afternoon brain fog is completely gone."

22,000+ women using it daily.

For aging skin:

Here's what users report:

⭐ "My skin looks plumper and more refreshed in the morning."

⭐ "The puffiness is gone."

⭐ "People keep asking if I got work done."

30,000+ women have made the switch.

For entrepreneur burnout:

Here's what founders are saying:

⭐ "I finally feel like myself again."

⭐ "I'm making better decisions because I'm not running on adrenaline."

⭐ "My team says I'm calmer and more present."

5,000+ entrepreneurs have gone through the program.

SECTION 10: EMOTIONAL RESOLUTION + CTA

EMOTIONAL DESIRE RESOLUTION (CRITICAL):

[1-2 sentences resolving the core emotional desire using desire resolution phrases from language bank]

[Line break]

[Call to action - 1 sentence]

[Line break]

[CTA emoji] [Direct action with URL]

[Line break]

[Risk reversal - 1 sentence]

[Line break]

[URL]

Word count target: 50-70 words

Formatting: Emotional resolution first, then CTA. Line breaks throughout.

EXAMPLE FORMATS (DIFFERENT NICHES):

For cat water fountain:

> You can finally stop living in constant fear that something's wrong with your senior cat.
>
> Get Purrify at [URL]
>
> 👉 [URL]
>
> 30-day money-back guarantee.
>
> [URL]

For brain fog:

> And you can stop feeling like your brain is betraying you.
>
> Try NightBreathe risk-free at [URL]
>
> 👉 [URL]
>
> Full refund if you don't feel sharper within 30 days.
>
> [URL]

For aging skin:

> You can finally stop watching yourself age in the mirror feeling powerless to stop it.
>
> Get SleepGlow at [URL]
>
> 👉 [URL]
>
> 60-day guarantee. Return if you don't see results.
>
> [URL]

For entrepreneur burnout:

And you can stop sacrificing your health and relationships for your business.

Start RestOS today at [URL]

👉 [URL]

90-day full refund if you don't feel the difference.

[URL]

📊 COPY METADATA

Total Word Count: [X words - should be 500-700]

Signs Used: [List the signs/symptoms]

- Total signs: [X - should be 3-5]
- Each sign includes mini-story: [Yes/No]

Avatar Language Integration:

Section 1 (Signs):

- "[Exact phrase used]" from [Language Bank Section]
- "[Exact phrase used]" from [Language Bank Section]
- "[Exact phrase used]" from [Language Bank Section]

Section 3 (Root Cause):

- "[Exact phrase used]" from [Language Bank Section]

Section 5 (Consequences):

- "[Exact phrase used]" from [Language Bank Section]
- "[Exact phrase used]" from [Language Bank Section]

Section 9 (Social Proof):

- "[Exact phrase used]" from [Language Bank Section]
- "[Exact phrase used]" from [Language Bank Section]

Section 10 (Emotional Resolution):

- "[Exact phrase used for emotional resolution]" from [Language Bank Section]

Total phrases used: [X - should be 12-18]

Sentence Structure Analysis:

- Average sentence length: [X words - should be 8-12]
- Longest sentence: [X words]
- Shortest sentence: [X words]
- Rhythm: [Should feel educational but accessible]

Formatting Analysis:

Line Breaks:

- Total line breaks: [X - should be 30-40]
- Average sentences per paragraph: [X - should be 1-2]
- Dense blocks: [X - should be 0]

Emoji Usage:

- Total emojis: [X - should be 10-16]
- Number emojis in signs: [X - should match number of signs]
- ❌ bullets in consequences: [X - should be 3-4]
- ⭐ in social proof: [X - should be 3]
- CTA emoji: [X]
- All from approved set: [Yes/No]

Mobile Readability:

- Scannability: [High/Medium/Low - should be High]
- White space: [Generous/Adequate - should be Generous]
- Signs section clear and distinct: [Yes/No - should be Yes]

Emotional Resolution:

- Core desire addressed: [Yes/No]
- Uses desire resolution phrases: [Yes/No]
- Feels like emotional payoff: [Yes/No]

✓ QUALITY CHECKLIST

Self-Diagnosis Hook: ✓ Section 0 invites self-assessment ✓ Creates "do I have these signs?" engagement ✓ Specific to target audience

Signs/Symptoms List: ✓ 3-5 distinct signs (Section 1) ✓ Each sign has number emoji ✓ Each sign includes 2-4 sentence mini-story ✓ Signs use avatar language from language bank ✓ Signs are identifiable/observable ✓ Signs escalate or vary in type

Framework Structure: ✓ Self-diagnosis hook (Section 0) ✓ Numbered signs with mini-stories (Section 1) ✓ Transition if-then statement (Section 2) ✓ Root cause reveal (Section 3) ✓ Mechanism explanation (Section 4) ✓ Consequences with ❌ bullets (Section 5, 3-4 bullets) ✓ "I discovered the fix" transition (Section 6) ✓ Product introduction (Section 7) ✓ How it works (Section 8) ✓ Social proof with ⭐ (Section 9, 3 snippets) ✓ Emotional desire resolved (Section 10) ✓ CTA with risk reversal (Section 10)

Language Bank Integration: ✓ Avatar phrases in signs ✓ Avatar phrases in root cause ✓ Avatar phrases in consequences ✓ Transformation phrases in social proof ✓ Desire resolution phrases in Section 10 ✓ 12-18 exact phrases used naturally

Sentence Structure: ✓ Average 8-12 words per sentence ✓ Educational but accessible rhythm ✓ Some single-word sentences for impact ✓ Varied lengths ✓ Natural flow

Formatting: ✓ Line breaks after every 1-2 sentences ✓ NO dense blocks ✓ Number emojis for signs ✓ ❌ bullets formatted with spacing (3-4) ✓ ⭐ for social proof (3) ✓ Emojis from approved set only ✓ Total emoji count: 10-16 ✓ Mobile-friendly

Emotional Resolution: ✓ Section 10 includes desire resolution ✓ Uses language bank phrases ✓ Addresses emotional want ✓ Feels like relief/clarity ✓ Before final CTA

Tone: ✓ Educational and diagnostic ✓ Creates "aha" moment with root cause ✓ Accessible (not overly technical) ✓ Empathetic to their experience

---

👉 USER ACTIONS:

Type "APPROVED" → Copy is ready

Type "REVISE [section name]" → Regenerate section

Type "MORE LINE BREAKS IN [section name]" → Add breathing room

Type "MORE AVATAR LANGUAGE IN [section name]" → Add phrases

Type "NEW PAIN POINT" → Go back to Phase 1

SYSTEM INSTRUCTIONS FOR CLAUDE

When executing this prompt:

Phase 1: Pain Point Selection

- Extract all pain points from avatar sheet
- For each, identify core emotional desire
- Assess diagnostic potential (can pain point manifest as multiple signs?)
- Present numbered list
- Wait for selection

Phase 2: Signs/Symptoms Generation

- Generate 5-7 identifiable signs/symptoms
- Each must be observable and create "yes, that's me" reaction
- Each should be distinct (not repetitive)
- Use avatar language when possible
- Recommend best 3-5 signs to use
- Wait for approval

Phase 3: Language Extraction

- Extract avatar phrases: sign-specific (already in signs), root cause, consequences, transformation, desire resolution
- Pull exact phrases word-for-word
- Find 2-3 desire resolution phrases
- Wait for continuation

Phase 4: Emoji Strategy

- Analyze context
- Recommend appropriate emojis

- Number emojis for signs
- ❌ for consequences (3-4)
- ⭐ for social proof (3)
- Moderate-heavy count (10-16 total)
- Wait for approval

Phase 5: Copy Generation

- Section 0: Self-diagnosis hook
- Section 1: Numbered signs (3-5) with number emojis, each with 2-4 sentence mini-story using avatar language
- Section 2: Transition if-then
- Section 3: Root cause reveal (the "aha")
- Section 4: Mechanism explanation
- Section 5: ❌ bullets for consequences (3-4)
- Section 6: "I discovered" transition
- Section 7: Product intro
- Section 8: How it works
- Section 9: Social proof with ⭐ (3 snippets) using transformation phrases
- Section 10: Emotional desire resolution + CTA
- Line break after every 1-2 sentences
- Use approved emojis only
- Integrate avatar language throughout (12-18 phrases)
- Keep educational but accessible (8-12 words avg per sentence)

Quality Validation:

- Check: Does Section 0 invite self-assessment?
- Check: Does each sign have a mini-story (2-4 sentences)?
- Check: Are signs distinct and identifiable?
- Check: Is root cause reveal clear and creates "aha"?
- Check: Are ❌ and ⭐ formatted correctly?
- Check: Line breaks after every 1-2 sentences?
- Check: Avatar language in signs, cause, consequences, social proof, and resolution?
- Check: Emotional desire resolved in Section 10 before CTA?
- Check: Word count 500-700?
- Check: No dense blocks?

CRITICAL REMINDERS

1. Self-diagnosis is the engagement mechanism

Section 0 must invite them to check for signs, not just list signs.

2. Each sign needs a mini-story

Section 1: Don't just list signs. Each needs 2-4 sentences showing how it manifests with emotional impact.

3. Root cause reveal is the "aha" moment

Section 3 connects the dots. This is where they understand WHY they have these signs.

4. This is a longer framework

Target 500-700 words (longer than Situational Problem-Solver, shorter than some story-driven ads).

5. Social proof uses testimonial snippets

Section 9: Short, punchy quotes (one sentence each) with ⭐ emojis.

6. Educational but accessible tone

More informative than emotional, but still relatable and uses avatar language.

7. Examples show niche diversity

All sections include examples across multiple niches.

8. Signs must be DISTINCT

Don't repeat the same sign in different words. Each should reveal a different manifestation.

NOW BEGIN WITH PHASE 1: PAIN POINT SELECTION
