WHAT THIS FRAMEWORK DOES

Generates medium-form ad copy (450-550 words) using "Do You Ever Feel..." framework.

This framework opens with an empathy question that creates immediate emotional resonance, then reveals the hidden cause and solution.

Structure: 0. Relatable question hook ("Do you ever feel...")

1. List of symptoms/frustrations (3-4 items)
2. "It's not just bad luck" transition
3. Real cause reveal (what's actually happening)
4. Mechanism explanation (why this causes the problem)
5. "That's why I created/found..." transition

6. Product introduction
7. How it works
8. Benefits with ✅ checkmarks
9. Social proof
10. Emotional desire resolution + CTA

Total length: 450-550 words

Optimized for Facebook/Instagram: Empathy-first, heavy line breaks, builds from feeling to solution.

PHASE 1: PAIN POINT SELECTION

First, I'll analyze your Macro Avatar sheet and extract all the pain points.

OUTPUT:

=== PAIN POINTS IDENTIFIED ===

Based on your Macro Avatar sheet, here are the primary pain points:

1. [Pain point from avatar sheet]

    - Emotional intensity: [X/5 based on language bank]
    - Primary emotion: [Fear/Frustration/Anxiety/Guilt]
    - Core desire behind this pain: [What they emotionally want]
    - Language bank coverage: [Strong/Moderate/Light]
    - Empathy potential: [High/Medium/Low - can this be expressed as a relatable "Do you ever feel..." question?]
2. [Pain point from avatar sheet]

    - Emotional intensity: [X/5]
    - Primary emotion: [Fear/Frustration/Anxiety/Guilt]
    - Core desire behind this pain: [What they emotionally want]
    - Language bank coverage: [Strong/Moderate/Light]
    - Empathy potential: [High/Medium/Low]
3. [Pain point from avatar sheet]

    - Emotional intensity: [X/5]
    - Primary emotion: [Fear/Frustration/Anxiety/Guilt]
    - Core desire behind this pain: [What they emotionally want]
    - Language bank coverage: [Strong/Moderate/Light]
    - Empathy potential: [High/Medium/Low]

4. [Pain point from avatar sheet]

    - Emotional intensity: [X/5]
    - Primary emotion: [Fear/Frustration/Anxiety/Guilt]
    - Core desire behind this pain: [What they emotionally want]
    - Language bank coverage: [Strong/Moderate/Light]
    - Empathy potential: [High/Medium/Low]

[Continue for all pain points found in avatar sheet, typically 3-7 total]

👉 SELECT THE PAIN POINT FOR THIS AD: Type the number (1-7)

PHASE 2: EMPATHY QUESTION GENERATION

Now I'll generate "Do you ever feel..." style questions that capture this pain point.

OUTPUT:

=== EMPATHY QUESTION GENERATION ===

Pain Point Being Addressed: [The selected pain point]

Core Emotional Desire: [What they emotionally want]

Primary Emotion: [Fear/Frustration/Anxiety/Guilt]

I'll generate 8 empathy question options that create immediate emotional resonance.

EMPATHY QUESTION REQUIREMENTS:

- Starts with "Do you ever feel..." or similar empathy phrase
- Captures the emotional experience, not just the symptom
- Uses avatar language when possible
- Should make them think "yes, that's exactly how I feel"
- Can be one question or 2-3 related questions
- Vulnerable and relatable

EMPATHY QUESTION OPTIONS:

QUESTION #1: "[Empathy question]"

- Why it resonates: [How this captures the emotional experience]
- Avatar language used: [Which phrases from language bank]
- Emotional hook: [X/5 - how strong is the emotional pull]

QUESTION #2: "[Question]"

- Why it resonates: [Explanation]
- Avatar language used: [Phrases]
- Emotional hook: [X/5]

QUESTION #3: "[Question]"

- Why it resonates: [Explanation]
- Avatar language used: [Phrases]
- Emotional hook: [X/5]

QUESTION #4: "[Question]"

- Why it resonates: [Explanation]
- Avatar language used: [Phrases]
- Emotional hook: [X/5]

QUESTION #5: "[Question]"

- Why it resonates: [Explanation]
- Avatar language used: [Phrases]
- Emotional hook: [X/5]

QUESTION #6: "[Question]"

- Why it resonates: [Explanation]
- Avatar language used: [Phrases]
- Emotional hook: [X/5]

QUESTION #7: "[Question]"

- Why it resonates: [Explanation]
- Avatar language used: [Phrases]
- Emotional hook: [X/5]

QUESTION #8: "[Question]"

- Why it resonates: [Explanation]
- Avatar language used: [Phrases]
- Emotional hook: [X/5]

TOP 3 RECOMMENDED:

→ Question #[X] - [Why this creates strongest empathy for this avatar] → Question #[X] - [Why this works well] → Question #[X] - [Why this is effective]

👉 SELECT YOUR EMPATHY QUESTION: Type the number (1-8)

OR

Type "YOUR OWN: [your question]" if you have a different one

Once selected, type "CONTINUE TO LANGUAGE EXTRACTION"

PHASE 3: PAIN POINT LANGUAGE EXTRACTION

Now I'll extract the exact language your avatar uses for this pain point.

OUTPUT:

=== PAIN POINT LANGUAGE EXTRACTION ===

Pain Point Being Addressed: [The selected pain point]

Empathy Question Selected: "[The question]"

Core Emotional Desire: [What they emotionally want]

Avatar's Exact Language (From Language Bank):

Frustration list phrases (use in Section 1):

- "[Exact phrase from language bank]" from [Section name]
- "[Exact phrase from language bank]" from [Section name]
- "[Exact phrase from language bank]" from [Section name] [3-5 phrases about symptoms/frustrations]

Cause explanation phrases (use in Section 3-4):

- "[Exact phrase about cause]" from [Section name]
- "[Exact phrase about mechanism]" from [Section name] [2-3 phrases total]

Benefit phrases (use in Section 8 with ✅):

- "[Exact phrase about desired outcome]" from [Section name]
- "[Exact phrase about relief]" from [Section name]
- "[Exact phrase about transformation]" from [Section name] [3-4 phrases total]

Social proof phrases (use in Section 9):

- "[Exact phrase about transformation]" from [Section name]
- "[Exact phrase about relief]" from [Section name] [2-3 phrases total]

Desire resolution phrases (use for emotional resolution):

- "[Exact phrase about what they want emotionally]" from [Section name]
- "[Exact phrase about desired state]" from [Section name] [2-3 phrases about relief, peace, control]

Emotional Tone: [Primary emotion: Fear/Frustration/Anxiety/Guilt]

Intensity Level: [X/5]

👉 Type "CONTINUE TO EMOJI SELECTION"

PHASE 4: EMOJI STRATEGY

Now I'll analyze your product, avatar, and pain point to recommend contextually appropriate emojis.

OUTPUT:

=== EMOJI RECOMMENDATIONS ===

Context Analysis:

Product category: [Category] Avatar demographics: [Gender, age range, key characteristics] Pain point emotion: [Primary emotion] Framework: Empathy Lead (feeling-first, solution-focused tone)

Recommended Emoji Set for This Ad:

For Empathy/Problem (1-2 options): 😔 [Sad face - universal empathy] [Emoji] - [Why this makes sense for this context]

For Benefits (3-5 options): ✅ [Checkmark - universal] [Emoji] - [Why this makes sense for this context] [Emoji] - [Why this makes sense for this context] [Emoji] - [Why this makes sense for this context]

For Product/Solution (1-2 options): [Emoji] - [Why this makes sense for this context] [Emoji] - [Why this makes sense for this context]

For Transformation (1-2 options): ✨ [Sparkles - universal transformation] [Emoji] - [Why this makes sense for this context]

For Social Proof (1-2 options): ⭐ [Star - testimonial related] [Emoji] - [Why this makes sense for this context]

For CTA (1-2 options): 👉 [Pointing finger - universal] [Emoji] - [Why this makes sense for this context]

Total Emoji Budget: 10-16 emojis across the entire ad

This framework uses moderate-to-heavy emoji count due to benefits section and social proof.

Example Placement Strategy:

- Section 0 (Empathy question): 0-1 empathy emoji
- Section 1 (Frustration list): 0-1 emojis (let words carry emotion)
- Section 6 (Product): 1 product emoji
- Section 8 (Benefits): 3-5 ✅ bullets
- Section 9 (Social proof): 2-3 ⭐ or quote emojis
- Section 10 (CTA): 1 CTA emoji

👉 APPROVE EMOJI STRATEGY: Type "APPROVED" to use these emojis Type "MODIFY: [your changes]" to adjust Type "MINIMAL EMOJIS" to only use ✅ ⭐ ✨ 👉

Once approved, type "GENERATE COPY"

PHASE 5: COPY GENERATION

Now I'll generate the complete ad using the empathy lead framework.

CRITICAL WRITING RULES

1. EMPATHY QUESTION IS THE HOOK

Section 0 must create immediate "yes, that's me" recognition.

Not asking for information. Creating emotional resonance.

2. AVATAR LANGUAGE IS EVERYTHING

Use exact phrases throughout:

- In frustration list
- In cause explanation
- In benefits
- In social proof
- In emotional resolution

3. SENTENCE STRUCTURE

Average sentence length: 8-12 words.

Mix short and slightly longer for natural rhythm.

Conversational and warm.

4. FORMATTING FOR FACEBOOK/INSTAGRAM

Line Breaks:

- Break after every 1-2 sentences
- Extra space around benefits section
- White space creates breathing room

Emoji Usage:

- Use ONLY approved emojis
- Total: 10-16 emojis
- Heavy ✅ in benefits (3-5)

Paragraph Structure:

- 1-2 sentences per paragraph MAX
- Each frustration gets own line in Section 1

5. CAUSE REVEAL FEELS LIKE INSIGHT

Section 3 should feel like you're letting them in on something they didn't know.

"Here's what's actually happening..."

Shifts from feeling to understanding.

6. BENEFITS FOCUS ON RELIEF

Section 8 benefits should emphasize emotional relief as much as functional outcomes.

Uses avatar language about what they want.

7. SOCIAL PROOF IS TRANSFORMATION-FOCUSED

Section 9 shows emotional transformation, not just functional results.

Uses ⭐ or quote formatting.

8. EMOTIONAL DESIRE RESOLUTION

Section 10, after social proof and before CTA, includes 1-2 sentences resolving the core emotional desire.

Uses desire resolution phrases from language bank.

COPY OUTPUT

=== DO YOU EVER FEEL AD ===

TARGETING REMINDER: Avatar: [Identifier] Pain Point: [The specific pain being addressed] Empathy Question: "[The question]" Core Emotional Desire: [What they emotionally want] Emotional Tone: [Primary emotion] Intensity: [X/5] Emoji Strategy: [Approved emoji set]

SECTION 0: RELATABLE EMPATHY QUESTION HOOK

[The empathy question - "Do you ever feel..." or similar]

[Optional empathy emoji if approved]

Word count target: 15-35 words

Formatting: Can be one question or 2-3 related questions. Creates immediate emotional recognition.

EXAMPLE FORMATS (DIFFERENT NICHES):

For chronic illness/getting sick often:

> Do you ever feel like you're always fighting something?
>
> One week it's a sore throat. Next week it's a head cold. Then you're run-down all over again.

For brain fog/cognitive issues:

> Do you ever feel like your brain isn't working the way it used to?
>
> Words escape you. You forget why you walked into rooms. Your mind feels foggy by 2 PM.

For cat anxiety/kidney disease fear:

> Do you ever feel like you're constantly waiting for the other shoe to drop with your senior cat?
>
> Checking for symptoms. Worrying about their water intake. Living in fear of that emergency vet call.

For mom burnout:

> Do you ever feel like you're giving everything to everyone and have nothing left for yourself?
>
> You're exhausted. You're irritable. You don't recognize yourself anymore.

SECTION 1: LIST OF SYMPTOMS/FRUSTRATIONS

[List 3-4 specific symptoms or frustrations related to the empathy question]

[Each gets own line]

[Use avatar language from frustration list phrases]

Word count target: 40-60 words

Formatting: Short, punchy statements. Each frustration on own line or in short paragraph.

EXAMPLE FORMATS (DIFFERENT NICHES):

For chronic illness:

> One week it's a sore throat. Next week it's a head cold. Then you're run-down all over again.
>
> You can't remember the last time you felt actually healthy.
>
> And you're starting to wonder if this is just your life now.

For brain fog:

> You freeze mid-sentence looking for words.
>
> You walk into rooms and forget why you're there.
>
> By afternoon, thinking clearly feels impossible.
>
> You feel older than you are.

For cat anxiety:

> You're checking their water bowl multiple times a day.
>
> You're monitoring every litter box visit.
>
> You're anxiously Googling symptoms at 2 AM.
>
> The fear never goes away.

For mom burnout:

> You snap at your kids over small things.
>
> You dread bedtime because it means you have to do it all again tomorrow.
>
> You can't remember what you used to enjoy.
>
> You're running on fumes.

SECTION 2: TRANSITION

["It's not just bad luck" or "It's not in your head" or "You're not imagining it"]

[Line break]

[1 sentence bridging to cause]

Word count target: 15-30 words

Formatting: Validates their experience before explaining cause.

EXAMPLE FORMATS:

It's not just bad luck.

There's an actual reason this keeps happening.

You're not imagining it.

Something real is causing this.

It's not in your head.

There's a physical reason you feel this way.

This isn't normal aging.

There's something specific happening that you can address.

SECTION 3: REAL CAUSE REVEAL

[Reveal the underlying cause - what's actually happening]

[Line break after every 1-2 sentences]

[Use avatar language when possible]

Word count target: 50-70 words

Formatting: This is the insight moment. Clear and direct.

EXAMPLE FORMATS (DIFFERENT NICHES):

For chronic illness:

Here's what's actually happening.

When you sleep with your mouth open, you breathe in dry, unfiltered air.

Your nose — your body's built-in air filter — is switched off.

That means bacteria and viruses that your nose normally traps go straight to your lungs.

No wonder you keep getting sick.

For brain fog:

Here's the truth.

When you mouth breathe at night, your brain doesn't get enough oxygen.

Your tongue falls back. Oxygen levels drop.

Your brain can't fully recharge or flush out toxins.

You're operating in a state of constant oxygen deficit.

For cat anxiety:

Here's what's really going on.

Cats have a naturally low thirst drive. They evolved to get moisture from prey, not drinking water.

So when they're relying on a still water bowl, they don't drink enough.

Their kidneys work overtime. And you have no way to know if they're adequately hydrated.

For mom burnout:

Here's what's happening.

Your nervous system is stuck in fight-or-flight mode.

You're running on cortisol and adrenaline 24/7.

Your body literally can't rest. Even when you have downtime, you can't turn off.

You're physiologically incapable of relaxing right now.

SECTION 4: MECHANISM EXPLANATION

[Explain the mechanism/science behind the cause - 2-3 sentences]

[Line break after every 1-2 sentences]

Word count target: 40-60 words

Formatting: Educational but accessible. Connects to their experience.

EXAMPLE FORMATS (DIFFERENT NICHES):

For chronic illness:

> Mouth breathing also weakens your immune system.
>
> Studies show mouth breathers get 2-3 times more infections.
>
> Your body's natural defense system is compromised every single night.

For brain fog:

> Nasal breathing delivers up to 18% more oxygen to your brain.
>
> That oxygen fuels memory, focus, and mental clarity.
>
> Without it, your cognitive function slowly declines.

For cat anxiety:

> Dehydration puts chronic strain on their kidneys.
>
> CKD is progressive no matter what. But inadequate hydration accelerates the damage.
>
> And you can't see it happening until it's too late.

For mom burnout:

> When you're stuck in fight-or-flight, your body can't access rest-and-digest mode.
>
> You can't repair. You can't recover. You can't think clearly.
>
> Everything feels harder because your nervous system won't let you rest.

SECTION 5: TRANSITION TO SOLUTION

["That's why I created/found/switched to..." or "This is why I..."]

[Line break]

[1 sentence about discovery]

Word count target: 15-30 words

Formatting: Personal and hopeful. Bridges from problem to solution.

EXAMPLE FORMATS:

> That's why I created [Product Name].
>
> This is why I switched to [Product Name].
>
> That's when I found [Product Name].
>
> I discovered [Product Name] after years of dealing with this myself.

SECTION 6: PRODUCT INTRODUCTION

[Product name + what it is - 1-2 sentences]

[Line break]

[How it addresses the root cause - 1-2 sentences]

[Optional product emoji]

Word count target: 40-60 words

Formatting: Natural introduction. Connects product directly to cause from Section 3.

EXAMPLE FORMATS (DIFFERENT NICHES):

For chronic illness:

> ImmuneTape is a gentle mouth tape designed to keep you breathing through your nose while you sleep.
>
> When you breathe through your nose, you filter germs, boost oxygen by 18%, and activate nitric oxide.
>
> It's like wearing an immune mask inside your body.

For brain fog:

> ClarityStrip is a comfortable mouth tape that ensures nasal breathing all night.
>
> Your brain gets the oxygen it needs to recharge, flush toxins, and function properly.

You wake up with mental clarity instead of fog.

For cat anxiety:

FlowFountain is a cat water fountain designed to trigger their natural drinking instinct.

The flowing water mimics streams they're naturally drawn to.

They drink more without you having to force it — and you finally have visibility.

For mom burnout:

RestReset is a 30-day nervous system retraining program.

It teaches your body how to shift out of fight-or-flight mode.

You learn to rest without guilt or anxiety.

SECTION 7: HOW IT WORKS

[Key feature/mechanism 1 - 1 sentence]

[Line break]

[Key feature/mechanism 2 - 1 sentence]

[Line break]

[Key feature/mechanism 3 - 1 sentence]

[Line break]

[Why this solves the problem from Section 3 - 1 sentence]

Word count target: 40-60 words

Formatting: Simple, clear. Each feature gets own line.

SECTION 8: BENEFITS WITH ✅ CHECKMARKS

[Transition or jump straight into benefits]

[Line break]

✅ [Benefit 1 - use avatar language, emphasize relief]

[Line break]

✅ [Benefit 2 - use avatar language]

[Line break]

✅ [Benefit 3 - use avatar language]

[Line break]

[Optional ✅ benefit 4 if supported]

[Line break]

[Summary statement about transformation - 1 sentence]

Word count target: 50-80 words

Formatting: Each ✅ benefit gets own line. Focus on emotional relief AND functional outcomes.

EXAMPLE FORMATS (DIFFERENT NICHES):

For chronic illness:

> ✅ You filter out bacteria and viruses before they reach your lungs
>
> ✅ Your immune system gets stronger
>
> ✅ You stop getting sick every other week
>
> ✅ You finally feel healthy and energized
>
> You're not constantly fighting something anymore.

For brain fog:

> ✅ Your brain gets the oxygen it needs to function properly
>
> ✅ Mental clarity returns
>
> ✅ You remember words and names again
>
> ✅ That afternoon fog disappears
>
> You feel sharp and present again.

For cat anxiety:

✅ Your cat drinks 2-3x more water naturally

✅ You can see them hydrating throughout the day

✅ You stop living in constant fear about their kidneys

✅ You have peace of mind knowing you're doing everything you can

The anxiety finally lifts.

For mom burnout:

✅ Your nervous system learns to rest

✅ You stop snapping at your kids

✅ You have patience and presence again

✅ You remember what it feels like to be yourself

You're not just surviving anymore — you're actually living.

SECTION 9: SOCIAL PROOF

[Transition: "Women/People/Owners like you are reporting:" or similar]

[Line break]

⭐ "[Testimonial snippet 1 - emotional transformation, use social proof phrases]"

[Line break]

⭐ "[Testimonial snippet 2]"

[Line break]

⭐ "[Testimonial snippet 3]"

[Line break]

[Social proof numbers - 1 sentence]

Word count target: 50-70 words

Formatting: Each testimonial gets ⭐ and own line. Focus on transformation.

EXAMPLE FORMATS (DIFFERENT NICHES):

For chronic illness:

> People like you are saying:
>
> ⭐ "I haven't been sick in three months. That's a record for me."
>
> ⭐ "I finally feel like my immune system is working again."
>
> ⭐ "I'm not constantly run-down anymore."
>
> Over 12,000 people are using ImmuneTape nightly.

For brain fog:

> Women like you are reporting:
>
> ⭐ "It's like someone turned the lights back on in my brain."
>
> ⭐ "I can think clearly again. It's incredible."
>
> ⭐ "The fog is completely gone."
>
> 18,000+ women have made the switch.

For cat anxiety:

> Cat owners are saying:
>
> ⭐ "I finally stopped obsessing over their water intake."
>
> ⭐ "The constant anxiety is gone."
>
> ⭐ "I can see them drinking all day now. Total peace of mind."
>
> Over 25,000 cats are using FlowFountain.

For mom burnout:

> Moms in the program are reporting:
>
> ⭐ "I feel like myself again for the first time in years."
>
> ⭐ "I'm present with my kids instead of just surviving."

⭐ "I didn't realize how burnt out I was until I wasn't anymore."

3,000+ moms have completed RestReset.

SECTION 10: EMOTIONAL RESOLUTION + CTA

EMOTIONAL DESIRE RESOLUTION (CRITICAL):

[1-2 sentences resolving the core emotional desire using desire resolution phrases from language bank]

[Line break]

[Call to action - 1 sentence]

[Line break]

[CTA emoji] [Direct action with URL]

[Line break]

[Risk reversal - 1 sentence]

[Line break]

[URL]

Word count target: 50-70 words

Formatting: Emotional resolution first, then CTA. Line breaks throughout.

EXAMPLE FORMATS (DIFFERENT NICHES):

For chronic illness:

You can finally stop feeling like your body is constantly letting you down.

Try ImmuneTape risk-free at [URL]

👉 [URL]

30-day guarantee. Full refund if you're not healthier.

[URL]

For brain fog:

📊 COPY METADATA

Total Word Count: [X words - should be 450-550]

Empathy Question Used: "[The question]"

- Emotional resonance: [High/Medium - should be high]

Avatar Language Integration:

Section 0 (Empathy Question):

- "[Exact phrase if used]" from [Language Bank Section]

Section 1 (Frustration List):

- "[Exact phrase used]" from [Language Bank Section]
- "[Exact phrase used]" from [Language Bank Section]
- "[Exact phrase used]" from [Language Bank Section]

Section 3 (Cause Reveal):

- "[Exact phrase used]" from [Language Bank Section]

Section 8 (Benefits):

- "[Exact phrase used]" from [Language Bank Section]
- "[Exact phrase used]" from [Language Bank Section]
- "[Exact phrase used]" from [Language Bank Section]

Section 9 (Social Proof):

- "[Exact phrase used]" from [Language Bank Section]
- "[Exact phrase used]" from [Language Bank Section]

Section 10 (Emotional Resolution):

- "[Exact phrase used for emotional resolution]" from [Language Bank Section]

Total phrases used: [X - should be 12-18]

Sentence Structure Analysis:

- Average sentence length: [X words - should be 8-12]
- Longest sentence: [X words]
- Shortest sentence: [X words]
- Rhythm: [Should feel warm and conversational]

Formatting Analysis:

Line Breaks:

- Total line breaks: [X - should be 25-35]
- Average sentences per paragraph: [X - should be 1-2]

- Dense blocks: [X - should be 0]

Emoji Usage:

- Total emojis: [X - should be 10-16]
- Empathy emoji (optional): [X]
- ✅ bullets in benefits: [X - should be 3-4]
- ⭐ in social proof: [X - should be 3]
- CTA emoji: [X]
- All from approved set: [Yes/No]

Mobile Readability:

- Scannability: [High/Medium/Low - should be High]
- White space: [Generous/Adequate - should be Generous]
- Empathy creates connection: [Yes/No - should be Yes]

Emotional Resolution:

- Core desire addressed: [Yes/No]
- Uses desire resolution phrases: [Yes/No]
- Feels like emotional payoff: [Yes/No]

✓ QUALITY CHECKLIST

Empathy Hook: ✓ Section 0 creates immediate "that's me" recognition ✓ Uses empathy language ("Do you ever feel...") ✓ Emotionally resonant, not just symptom-based

Framework Structure: ✓ Empathy question hook (Section 0) ✓ Frustration/symptom list (Section 1, 3-4 items) ✓ Validation transition (Section 2 - "It's not just bad luck") ✓ Real cause reveal (Section 3) ✓ Mechanism explanation (Section 4) ✓ Solution transition (Section 5) ✓ Product introduction (Section 6) ✓ How it works (Section 7) ✓ Benefits with ✅ (Section 8, 3-4 bullets) ✓ Social proof with ⭐ (Section 9, 3 snippets) ✓ Emotional desire resolved (Section 10) ✓ CTA with risk reversal (Section 10)

Language Bank Integration: ✓ Avatar phrases in empathy question (if applicable) ✓ Avatar phrases in frustration list ✓ Avatar phrases in cause explanation ✓ Avatar phrases in benefits ✓ Transformation phrases in social proof ✓ Desire resolution phrases in Section 10 ✓ 12-18 exact phrases used naturally

Sentence Structure: ✓ Average 8-12 words per sentence ✓ Warm, conversational rhythm ✓ Varied lengths ✓ Natural flow

Formatting: ✓ Line breaks after every 1-2 sentences ✓ NO dense blocks ✓ Frustration list is scannable ✓ ✅ bullets formatted with spacing (3-4) ✓ ⭐ for social proof (3) ✓ Emojis from approved set only ✓ Total emoji count: 10-16 ✓ Mobile-friendly

Emotional Resolution: ✓ Section 10 includes desire resolution ✓ Uses language bank phrases ✓ Addresses emotional want ✓ Feels like relief/understanding ✓ Before final CTA

Tone: ✓ Empathetic and warm ✓ Understanding without being patronizing ✓ Validates their experience ✓ Offers insight and hope

---

👉 USER ACTIONS:

Type "APPROVED" → Copy is ready

Type "REVISE [section name]" → Regenerate section

Type "MORE LINE BREAKS IN [section name]" → Add breathing room

Type "MORE AVATAR LANGUAGE IN [section name]" → Add phrases

Type "STRENGTHEN EMOTIONAL RESOLUTION" → Make desire resolution more impactful

Type "ADJUST TONE TO [direction]" → Make it more [urgent/casual/empathetic/etc]

Type "DIFFERENT QUESTION" → Go back to Phase 2

Type "DIFFERENT EMOJIS" → Go back to Phase 4

Type "NEW PAIN POINT" → Go back to Phase 1

SYSTEM INSTRUCTIONS FOR CLAUDE

When executing this prompt:

Phase 1: Pain Point Selection

- Extract all pain points from avatar sheet
- For each, identify core emotional desire
- Assess empathy potential (can this be expressed as "Do you ever feel..." question?)
- Present numbered list
- Wait for selection

Phase 2: Empathy Question Generation

- Generate 8 empathy question options
- Each must create "that's exactly how I feel" recognition
- Use avatar language when possible
- Start with "Do you ever feel..." or similar
- Can be one question or 2-3 related questions
- Recommend top 3
- Wait for selection

Phase 3: Language Extraction

- Extract avatar phrases: frustrations (for list), cause explanation, benefits, social proof, desire resolution
- Pull exact phrases word-for-word
- Find 2-3 desire resolution phrases
- Wait for continuation

Phase 4: Emoji Strategy

- Analyze context
- Recommend appropriate emojis
- Focus on empathy, benefits (✅), social proof (⭐)
- Moderate-heavy count (10-16 total)
- Wait for approval

Phase 5: Copy Generation

- Section 0: Empathy question (creates immediate emotional resonance)
- Section 1: Frustration/symptom list (3-4 items using avatar language)
- Section 2: Validation transition ("It's not just bad luck")
- Section 3: Real cause reveal (the insight)
- Section 4: Mechanism explanation
- Section 5: Solution transition ("That's why I...")
- Section 6: Product introduction
- Section 7: How it works
- Section 8: ✅ bullets for benefits (3-4, emphasize relief + function)
- Section 9: Social proof with ⭐ (3 snippets, transformation-focused)
- Section 10: Emotional desire resolution + CTA
- Line break after every 1-2 sentences
- Use approved emojis only
- Integrate avatar language throughout (12-18 phrases)
- Keep warm and conversational (8-12 words avg per sentence)

Quality Validation:

- Check: Does empathy question create immediate recognition?
- Check: Are frustrations in Section 1 specific and relatable?

- Check: Does cause reveal feel like insight?
- Check: Are ✅ and ⭐ formatted correctly?
- Check: Line breaks after every 1-2 sentences?
- Check: Avatar language in frustrations, benefits, social proof, and resolution?
- Check: Emotional desire resolved in Section 10 before CTA?
- Check: Word count 450-550?
- Check: No dense blocks?
- Check: Tone is empathetic and warm?

CRITICAL REMINDERS

1. Empathy question is the hook

Section 0 must create immediate emotional resonance through "Do you ever feel..." format.

2. This is feeling-first, not fact-first

Unlike Research Reveal, this leads with emotion before explaining cause.

3. Cause reveal is insight moment

Section 3 shifts from "this is how you feel" to "this is why you feel this way."

4. Benefits emphasize relief

Section 8: Not just functional outcomes but emotional relief from the frustrations in Section 1.

5. Social proof is transformation-focused

Section 9: Use ⭐ formatting and show emotional transformation, not just functional results.

6. Warm, conversational tone

More empathetic than tactical. Like talking to someone who understands.

7. Examples show niche diversity

All sections include examples across multiple niches.

8. Avatar language creates relatability

Heavy use in Sections 0, 1, 8, 9, and 10 to create "they get me" feeling.

NOW BEGIN WITH PHASE 1: PAIN POINT SELECTION
