Copy & paste everything below this text into Claude OR ChatGPT with Macro Avatar Sheet + Macro Avatar Language Sheet Replace any yellow highlighted text with your specific product details.

PROMPT #3: MACRO-AVATAR AD COPY GENERATOR

I am generating ad copy for my brand **[YOUR BRAND NAME]**. We sell **[PRODUCT]**.

We are going to be writing for **[INSERT DESIRED MACRO AVATAR # HERE]**

Our website is **[YOUR WEBSITE]**.

In case my product page is not ready or you can't access it, I am going to attach product information from AMAZON for a similar product as mine.

[COPY & PASTE FULL PRODUCT DESCRIPTION FROM AMAZON HERE]

[ATTACH MACRO AVATAR SHEET OUTPUT]

[ATTACH MACRO AVATAR LANGUAGE BANK OUTPUT]

Generates story-format sales letters following the exact 8-section structure from annotated example.

8 SECTIONS:

1. Hook (Phase 1B)
2. Immediate Identification - 75-150 words
3. Amplification - 150-250 words
4. Product Discovery - 150-250 words
5. UMP Introduction - 100-150 words
6. UMS Introduction - 100-150 words
7. Transformation - 125-200 words
8. Call to Action - 150-200 words

Total: ~1,000-1,400 words

EXECUTION FLOW:

1. Phase 0: Provide avatar + product inputs
2. Phase 1A: Review targeting summary
3. Phase 1C: Generate & select mechanisms + discovery scenario
4. Phase 1B: Generate & select hook

5. Phase 2: Generate & approve lead (Sections 2-3)
6. Phase 3: Receive complete copy (Sections 4-8)

PHASE 0: REQUIRED INPUTS

MACRO AVATAR DEFINITION

- **Surface Desire:** [What they want most]
- **Core Experience:** [The #1 trigger event that created desire]
- **Dominant Emotion:** [FEAR/ANXIETY/FRUSTRATION/GUILT/etc.]
- **Awareness Level:** [Problem-Aware / Solution-Aware / Most-Aware]
- **Core Beliefs (Top 3):**
    1. [Causal belief about problem]
    2. [Mechanism belief about solutions]
    3. [Authority or product belief]
- **Current Behaviors (Top 3):**
    1. [Workaround they're doing]
    2. [Product they've tried]
    3. [Monitoring/routine behavior]

PRODUCT INFORMATION

- **Product/Brand Name:**
- **Website/Amazon URL:**
- **Product Category:**

PRODUCT FEATURES & SPECS

Provide the key features, materials, specifications, and any claims about the product.
The more detail you provide, the better the mechanism generation will be.

Format (any format works, just be thorough):

- **Materials:** [e.g., stainless steel, BPA-free plastic, silicone, etc.]
- **Key Features:** [e.g., filtration system, pump type, capacity, size, etc.]
- **Design Elements:** [e.g., shape, functionality, user experience features]
- **Any Claims:** [e.g., quiet operation, easy to clean, long-lasting, etc.]
- **Technical Specs:** [e.g., dimensions, weight, power, certifications]

You can also paste the full Amazon/product description here.

LANGUAGE BANK

[Required] Complete Macro Avatar Language Document with all 13 sections

---

ANTI-CONTAMINATION RULES

PERMANENTLY BANNED ELEMENTS: ❌ Doctor/medical professional persona (unless YOUR avatar is one) ❌ Hotel/vacation discovery contexts ❌ Sleep tracking devices (unless YOUR product) ❌ Travel locations from examples ❌ Specific ages/prices from examples ❌ "Three coffees" or consumption patterns from examples ❌ Medical conditions from examples (unless YOUR product addresses them) ❌ Relationship dynamics from examples (unless YOUR avatar experiences them)

HEADLINE PATTERN LIBRARY

Use these PATTERNS to create hooks (not literal headlines).

FEAR / LOSS PATTERNS

1. "A [small action] that cost a [person type] [specific loss]"
2. "Are you ever [embarrassing situation]?"
3. "Do you make these mistakes in [area]?"
4. "[Number] [problems] — which do you have?"
5. "Little [leaks] that keep [people] [suffering]"
6. "Does your [thing] ever embarrass you?"
7. "What everybody ought to know about [problem]"

CURIOSITY / SECRET PATTERNS

8. "The secret of [achieving outcome]"
9. "Who else wants [aspirational result]?"
10. "Thousands have this [gift] — but never discover it"
11. "Discover the [benefit] hidden in your [situation]"
12. "What [authority] discovered about [problem]"

TRANSFORMATION PATTERNS

13. "How I [achieved result] in [timeframe]"
14. "How a [discovery] made a [person type] [aspirational identity]"
15. "They laughed when I [action] — but when I [result]!"
16. "How I made a fortune with a [fool idea]"

17. "No more [negative] for me — yet [positive result]"
18. "I lost my [problem] ... and [bonus benefit], too"

IDENTIFICATION PATTERNS

19. "To [avatar description] who want to [desire] — but [obstacle]"
20. "To [people] who [unfulfilled desire]"
21. "Are you [negative identity]?"
22. "[Number] types of [category] — which are you?"

MECHANISM PATTERNS

23. "New [discovery] [achieves result] in [timeframe]"
24. "Why [brand] [delivers result] [this year]"
25. "How to [achieve goal] — [simple method]"
26. "[Surprising fact] about [problem]"

GUARANTEE PATTERNS

27. "[Result] in [timeframe] — or [risk reversal]"
28. "Guaranteed to [overcome obstacle] — or [consequence]"
29. "[Authority] prove [number] out of [number] can [result]"

QUESTION PATTERNS

30. "When [situation], this is what [authority] does"
31. "Who ever heard of [impossible combination]?"
32. "Whose fault when [problem occurs]?"
33. "Have you these symptoms of [condition]?"

ADVICE PATTERNS

34. "Advice to [group] [experiencing problem] — by a [peer]"
35. "[Number] reasons why it would have paid you to [action] [timeframe ago]"

SOCIAL PROOF PATTERNS

36. "Everywhere [people] are [enthusiastic action] about [product]"
37. "Thousands now [achieve goal] who never thought they could"
38. "You never saw such [reactions] as [people] got"

COMMAND PATTERNS

39. "Throw away your [old solution]!"

40. "Buy no [product] — until you've [done this]"

PHASE 1A: MACRO AVATAR TARGETING & ANGLE ANALYSIS

Input: Macro Avatar Definition + Language Bank
Objective:

1. Display targeting summary for review/modification
2. Extract 3-5 strongest emotional angles

OUTPUT FORMAT:

=== MACRO AVATAR TARGETING SUMMARY ===

Avatar Identifier: [Which macro avatar from the document - e.g., "Avatar #1: The Health-Anxious Protector"]

Surface Desire: [The #1 most common desire from macro avatar doc]

Core Experience: [The #1 trigger event that fuels the desire]

Dominant Emotion: [Primary emotional driver - FEAR/ANXIETY/FRUSTRATION/GUILT/etc.]

Intensity: [X/5 from language bank]

Awareness Level: [Problem-Aware / Solution-Aware / Most-Aware]

Core Belief Targeted: [The #1 most common belief from macro avatar]

Current Behavior Targeted: [The #1 most common behavior/workaround]

👉 REVIEW TARGETING ABOVE

If you want to modify any targeting element before mechanism generation, specify changes now:

- "Change emotion to [X]"

- "Target belief #2 instead"

- "Focus on behavior #3"

- etc.

Otherwise, type "CONFIRMED - ANALYZE ANGLES" to proceed with angle analysis.

=== AVATAR ANGLE ANALYSIS ===

PRIMARY EMOTIONAL ANGLES (Ranked by Intensity):

ANGLE 1: [EMOTION TYPE - X/5 Intensity]

- Trigger: [From Core Experience]

- Evidence: "[Exact quote from language bank]"

- Hook Potential: [Why this creates strong hook]

ANGLE 2: [EMOTION TYPE - X/5 Intensity]

- Trigger: [From Core Experience]

- Evidence: "[Exact quote]"

- Hook Potential: [Why this works]

ANGLE 3: [EMOTION TYPE - X/5 Intensity]

- Trigger: [From Core Experience]

- Evidence: "[Exact quote]"

- Hook Potential: [Why this works]

[Continue for top 3-5 angles based on language bank intensity]

RECOMMENDED ANGLE PRIORITY:

1. [Rank angles by strategic strength for hook generation]

2. [Second strongest]

3. [Third strongest]

MOST POWERFUL LANGUAGE PATTERNS:

- [High-frequency words appearing 10+ times in language bank]

- [Phrases with strong emotional charge]

- [Beliefs stated with certainty]

TABOO WORDS TO AVOID:

[List from language bank section 13 - words/phrases that repel this avatar]

👉 Type "GENERATE MECHANISMS" to proceed to Phase 1C

PHASE 1C: MECHANISM & DISCOVERY GENERATION

Input: Confirmed Targeting + Product Features & Specs + Avatar Analysis
Objective: Generate 3-5 UMP/UMS mechanism pairs + organic discovery scenario based on avatar characteristics

MECHANISM GENERATION REQUIREMENTS

Each mechanism pair must be:

✓ **Easy to Believe:**

- Based on common knowledge or obvious logic
- No conspiracy theories or fringe science
- "Makes sense" immediately

✓ **Easy to Understand:**

- Explainable in 2-3 sentences max
- No jargon (unless avatar is Most-Aware)
- Clear cause → effect relationship

✓ **Strategically Differentiated:**

- Addresses why failed solutions from avatar don't work
- Highlights actual product features (not made up)
- Creates "aha" moment for avatar

HOW TO GENERATE MECHANISMS

Process:

1. **Analyze Avatar's Failed Solutions:**
    - What have they tried that didn't work?
    - What do they currently believe causes the problem?
2. **Analyze Product Features:**
    - What materials/technology does the product use?
    - What does it do differently?
3. **Find the Gap:**
    - What do failed solutions LACK that this product HAS?
    - Create mechanism stories around those gaps
4. **Match to Sophistication:**
    - Problem-Aware: Simple, biological/intuitive mechanisms
    - Solution-Aware: More technical, addresses why first attempts failed
    - Most-Aware: Engineering/design depth, comparative mechanisms

DISCOVERY GENERATION REQUIREMENTS

Discovery must ALWAYS be:

✓ **Life Circumstance-Based** (NOT research-based)

- Visiting friend/neighbor
- Picking up something at someone's house
- Running into someone at vet
- Cat-sitting for someone
- Social gathering

✓ **Observable Proof First** (NOT product pitch)

- See their healthy/happy cat
- Notice they're calm/not anxious
- Observe results before product mention

✓ **Peer Recommendation** (NOT reviews/ads)

- Friend with similar cat
- Neighbor who solved same problem
- Acquaintance from cat community
- Someone avatar relates to

✓ **Casual Mention** (NOT selling)

- "Stopped worrying about..."

- "Changed my approach to..."
- "Part of my protocol now..."
- Product mentioned almost as afterthought

NEVER: ❌ "I was doing research online and found..." ❌ "I saw great reviews and decided to try..." ❌ "I was browsing forums when..." ❌ "I compared products and chose..."

OUTPUT FORMAT FOR PHASE 1C

=== MECHANISM & DISCOVERY GENERATION ===

Based on avatar analysis and product features, here are your options:

RECOMMENDED MECHANISM PAIR:

UMP (Unique Mechanism - Problem):

[2-3 sentences explaining the hidden problem with current solutions]

Why This is Easy to Believe:

[Based on common knowledge/obvious logic]

Why This is Easy to Understand:

[Simple cause → effect]

UMS (Unique Mechanism - Solution):

[2-3 sentences explaining how product uniquely solves the UMP]

Why This Works for Your Avatar:

- Awareness Level: [How this matches their sophistication]

- Failed Solutions: [Which specific failures this addresses]

- Dominant Emotion: [How this mechanism resonates emotionally]

ALTERNATIVE MECHANISM PAIRS:

OPTION 2:

UMP: [Different mechanism problem]

UMS: [Corresponding solution]

Best For: [When to use this instead - different awareness level, different failed solutions]

OPTION 3:

UMP: [Different mechanism problem]

UMS: [Corresponding solution]

Best For: [When to use this instead]

[Generate 3-5 total options]

RECOMMENDED DISCOVERY SCENARIO:

Life Circumstance:

[How they come into contact with someone - visiting, picking up package, etc.]

Observer:

[Who they encounter - friend with senior cat, neighbor who survived crisis, etc.]

Observable Proof (What They See First):

[Healthy cat, confident owner, visible results - BEFORE product mention]

Casual Mention (How Product Comes Up):

[Natural conversation about their approach, product mentioned as part of protocol]

Why This Works for Avatar:

[Matches their psychology - peer credibility, observable proof, casual not salesy]

ALTERNATIVE DISCOVERY SCENARIOS:

OPTION 2:

Life Circumstance: [Different context]

Observer: [Different peer]

Observable Proof: [Different results]

Best For: [Different avatar characteristic]

OPTION 3:

[Another alternative if needed]

👉 SELECT YOUR MECHANISM PAIR:

Type "APPROVED" to use recommended pair

Type "USE OPTION [2/3/4/5]" to select alternative

👉 SELECT YOUR DISCOVERY SCENARIO:

Type "APPROVED" to use recommended scenario

Type "USE DISCOVERY [2/3]" to select alternative

Once selected, type "GENERATE HOOKS" to proceed to Phase 1B

PHASE 1B: HOOK GENERATION

Input: Selected Mechanism Pair + Discovery Scenario + Avatar Angle Analysis + Pattern Library

Process:

1. Select patterns matching avatar's dominant emotion
2. Fill patterns with language bank phrases ONLY
3. Each hook communicates ONE core idea
4. Vary psychological approaches across all hooks
5. Make immediately clear (not clever or vague)

OUTPUT FORMAT:

=== HOOK OPTIONS (10-15 variations) ===

TARGETING REMINDER:

Avatar: [Name/identifier]

Desire: [Surface desire]

Emotion: [Dominant emotion]

Mechanism: [Selected UMP in one sentence]

HOOK #1:

"[Actual headline]"

Pattern: [Number from library]

Avatar Language:

- "[Phrase]" from [Language Bank section]
- "[Phrase]" from [Language Bank section]

Trigger: [Fear/Curiosity/Transformation/etc.]

Target Emotion: [Which angle from Phase 1A this targets]

Core Idea: [ONE thing this communicates]

HOOK #2:

"[Actual headline]"

Pattern: [Number]

Avatar Language:

- "[Phrase]" from [section]
- "[Phrase]" from [section]

Trigger: [Type]

Target Emotion: [Which angle]

Core Idea: [ONE thing]

[Continue for all 10-15 hooks]

👉 SELECT A HOOK

Type the number (1-15) to proceed to Phase 2

PHASE 2: LEAD GENERATION (SECTIONS 2-3)

Input: Selected Hook + Confirmed Targeting + Selected Mechanisms + Discovery Scenario
Objective: Generate the LEAD section (Immediate Identification + Amplification)

🚨 CRITICAL POV REQUIREMENT

BOTH SECTIONS MUST BE IN FIRST-PERSON ("I", "my", "me")

The entire lead is a first-person narrative showing current pain and failed solutions.

WRONG ❌: "You're hypervigilant now. You check multiple times a day."
CORRECT ✓: "I'm hypervigilant now. I check multiple times a day."

SECTION 2: IMMEDIATE IDENTIFICATION

Word Count: 75-150 words
POV: First-person ONLY ("I", "my", "me")

Purpose: Describe avatar's current pain state in their own words. Pure emotional identification.

Structure:

- Short, punchy sentences (5-10 words each)
- NO solutions mentioned yet
- NO technical explanations
- NO trigger moments or forum browsing
- Pure pain/frustration/fear description
- Make avatar see themselves in every sentence
- Line breaks every 2-3 sentences

Example Structure (NOT content to copy):

I'd been through [traumatic experience]. The [sensory detail]. The [emotional impact]. The [consequence].

Now I'm [current emotional state]. Every [trigger] feels like [fear].

I [monitoring behavior]. I [obsessive action]. I'm [emotional state].

I'm doing everything [authority] said. [Behavior 1]. [Behavior 2]. [Behavior 3].

But I still [fear/anxiety]. Because I know [belief about problem]. And I'm terrified [future outcome].

Language Sources:

- Daily Experience Language
- Psychological/Mental State Language
- Problem Language
- Emotional Expression
- Current Behaviors (from Phase 0)

What to NEVER include: ❌ "I was browsing forums when..." ❌ "I discovered a statistic that..." ❌ Trigger moments or research beginnings ❌ Failed solutions (that's Section 3) ❌ Discovery moments (that's Section 4) ❌ Technical explanations ❌ Product mentions ❌ Long, complex sentences ❌ Second-person POV ("you")

SECTION 3: AMPLIFICATION

Word Count: 150-250 words
POV: First-person ONLY ("I", "my", "me")

Purpose: Show problem getting worse + failed solutions + why they failed

Structure:

- Problem worsening despite efforts
- 2-3 specific failed solutions (from avatar's Current Behaviors in Phase 0)
- Why each didn't work (avatar's own explanations from language bank)
- Pain/frustration/fear at highest point
- Sets up need for Section 4 discovery
- Line breaks every 3-4 sentences
- Shows WHAT failed (NOT WHY mechanistically - that's Section 5)

Example Structure (NOT content to copy):

I knew [something was wrong]. I [what I did to investigate].

I ran every [test/attempt]. [List of things tried]. [More attempts].

Everything came back [inconclusive/normal/confusing].

I started [monitoring behavior]. [Tool or method used]. [What I tracked].

After [timeframe], [what the pattern showed]. [Specific observation]. [Another observation].

I tried everything. [Solution 1]. [Solution 2]. [Solution 3].

Nothing worked.

[Why solution 1 failed - avatar's words]. [Frustration/fear].

[Why solution 2 failed]. [Cost or consequence]. [More frustration/fear].

After [timeframe], [peak fear/frustration moment]. [Statement of cost/pain].

I was [stuck/terrified/exhausted]. [Statement of helplessness or being trapped].

Language Sources:

- Failed Solutions Language
- "Why it didn't work" subsection
- Frustration Language (or Fear Language for fear-driven avatars)
- Belief Language (what they thought would work)

- Problem Language (worsening)

What MUST be included: ✓ Specific failed attempts from Current Behaviors (Phase 0) ✓ Avatar's own words about why they failed ✓ Escalating dominant emotion (fear/frustration/anxiety) ✓ Sense of being stuck/trapped/terrified ✓ Reference to authority if avatar consulted one ✓ Peak moment of pain/fear/frustration

What to NEVER include: ❌ UMP explanation (mechanism explanation comes in Section 5) ❌ Product mention (discovery is Section 4) ❌ Technical jargon about WHY mechanistically things failed ❌ Just say WHAT failed, not the mechanical reason WHY ❌ Second-person POV ("you") ❌ Discovery moments (Section 4)

CRITICAL:
This section shows WHAT is failing.
Section 5 shows WHY mechanistically.
Keep them separate.

OUTPUT FORMAT FOR PHASE 2

=== THE LEAD (SECTIONS 2-3) ===

TARGETING REMINDER:

Avatar: [Identifier]

Desire: [Surface desire]

Emotion: [Dominant emotion]

Belief: [Core belief being addressed]

Behavior: [Current behavior being shown]

Mechanism: [Selected UMP in one sentence]

SECTION 2: IMMEDIATE IDENTIFICATION

[75-150 words of current pain state, first-person, short punchy sentences, line breaks every 2-3 sentences]

SECTION 3: AMPLIFICATION

[150-250 words showing failed solutions and why they failed, first-person, line breaks every 3-4 sentences]

📊 LEAD METADATA:

Total Word Count: [X words]

Section 2 Avatar Language Used:

- "[Phrase]" → from [Daily Experience Language]

- "[Phrase]" → from [Psychological State Language]

- "[Phrase]" → from [Current Behaviors]

[3-5 examples]

Section 3 Avatar Language Used:

- "[Phrase]" → from [Failed Solutions Language]

- "[Phrase]" → from [Frustration/Fear Language]

- "[Phrase]" → from [Problem Language]

[5-7 examples]

✓ STRUCTURE CHECKLIST:

Section 2:

✓ 75-150 words

✓ First-person POV throughout

✓ Short punchy sentences

✓ Line breaks every 2-3 sentences

✓ Current pain state only (no solutions)

✓ NO trigger moments or forum browsing

✓ NO discovery content

Section 3:

✓ 150-250 words

✓ First-person POV throughout

✓ 2-3 specific failed solutions shown

✓ Why each failed (avatar's words)

✓ Line breaks every 3-4 sentences

✓ Shows WHAT failed (not WHY mechanistically)

✓ Peak emotion moment (fear/frustration)

✓ Sense of being stuck/trapped/terrified

✓ PRINCIPLES CHECKLIST:

✓ Both sections in first-person

✓ Uses language bank phrases only

✓ No invented experiences

✓ Sophistication matches avatar awareness

✓ Dominant emotion emphasized throughout

✓ Failed solutions from Phase 0 Current Behaviors

✓ Sets up Section 4 naturally

⚠️ ANTI-CONTAMINATION CHECK:

✓ Does NOT use Phase 1C mechanism language literally

✓ Does NOT use Discovery Scenario details yet

✓ Does NOT start with trigger moments

✓ Does NOT mention "browsing forums" or research

✓ Does NOT mention product

✓ Does NOT explain mechanisms (Section 5 only)

✓ Does NOT include discovery moments (Section 4 only)

✓ Uses ONLY language bank phrases

✓ First-person POV in both sections

👉 APPROVE THIS LEAD?

Type one of:

- "APPROVED" → Proceed to Phase 3 (Sections 4-8)

- "REVISE SECTION 2: [feedback]" → Regenerate Section 2 only

- "REVISE SECTION 3: [feedback]" → Regenerate Section 3 only

- "REVISE BOTH: [feedback]" → Regenerate both sections

PHASE 3: FULL COPY GENERATION (SECTIONS 4-8)

Input: Approved Hook + Approved Lead (Sections 2-3) + Selected Mechanisms + Discovery Scenario
Objective: Generate complete Sections 4-8 in ONE OUTPUT

🚨 CRITICAL POV REQUIREMENT

SECTIONS 4-7 MUST BE IN FIRST-PERSON ("I", "my", "me")
ONLY SECTION 8 (CTA) switches to SECOND-PERSON ("you", "your")

The story is first-person until the final call to action.

SECTION 4: PRODUCT DISCOVERY

Word Count: 150-250 words
POV: First-person ONLY ("I", "my", "me")

Purpose: Organic discovery moment that feels accidental

Structure:

- Use selected Discovery Scenario from Phase 1C as conceptual guide
- Create specific scene matching that concept
- Show observable proof BEFORE product mention
- Product name revealed naturally through conversation
- Sets up question: "Why did this work?"
- Line breaks every 3-4 sentences

Discovery Scenario Usage:

✓ **DO use the CONCEPT from Phase 1C:**

- Life circumstance type (visiting friend, picking up package, etc.)
- Observer type (friend with similar situation, neighbor who solved problem)
- Observable proof first (healthy cat, calm owner, visible results)
- Casual mention pattern ("stopped worrying", "changed my approach")

❌ **DO NOT:**

- Copy Phase 1C discovery text literally
- Use specific names/places unless creating them fresh
- Make it feel researched or planned
- Skip the observable proof before product mention

CREATE a new specific scene that:

- Matches the CONCEPT from Phase 1C
- Uses language bank phrases for reactions
- Feels believable and organic
- Shows measurable change observer experienced
- Leads to systematic validation
- Reveals product name naturally in dialogue

Template Structure (NOT content to copy):

That was [timeframe] before [life circumstance from Phase 1C concept].

[Setting/situation]. [What they were doing]. [Why they were there].

[Observer's cat/situation appears]. [Observable detail 1]. [Observable detail 2].

"[Question about what I'm seeing]"

"[Observer's casual response with timeline]."

[My reaction - surprise/curiosity].

"[Question about how]"

[Observer walks me to where product is]. [Description of product running/working].

"[Observer's explanation of what they noticed - specific, measurable]."

I [observe product in action]. [Specific behavior]. [Another observation].

"[My reaction to visible proof]."

[Observer shows evidence - vet notes, measurements, timeline data].

In [timeframe], [observer's transformation summary]. [Specific results].

I [pull out phone]. "[What is it called?]"

"[Product name]," [observer] said. "[Key feature casual mention]. But I think it's really [mechanism hint]. [Observable effect on their pet]."

Language Sources:

- Discovery/Learning Language
- "Realization moments" subsection
- Transformation Language (early indicators for the observer)
- Problem Language (for contrast with observer's success)

What MUST be included: ✓ Life circumstance from Phase 1C (visiting, picking up something, etc.) ✓ Observable proof BEFORE product mention (healthy pet, calm owner, results) ✓ Specific, measurable change observer experienced ✓ Systematic validation (vet notes, data, timeline) ✓ Product name revealed in natural dialogue ✓ Transition question: "Why did this work?" ✓ First-person POV throughout

What to NEVER include: ❌ UMP explanation yet (that's Section 5) ❌ Technical mechanism details yet ❌ "I was researching and found..." ❌ "I saw great reviews..." ❌ Starting the section with research or product hunting ❌ Second-person POV ("you")

SECTION 5: UMP INTRODUCTION

Word Count: 100-150 words
POV: First-person ONLY ("I", "my", "me")

Purpose: Reveal the hidden mechanism that explains why other solutions fail

Structure:

- Transition from discovery to wanting to understand WHY
- Develop the UMP from Phase 1C into full explanation
- Reference back to Section 3 failed solutions explicitly
- Make it an "aha" revelation
- Set up Section 6 (how THIS product solves it)
- Line breaks every 3-4 sentences

Template Structure (NOT content):

[Transition - but/however/I was skeptical]. I'd tried [reference Section 3 specific attempts]. What made this different?

I started researching [topic related to UMP]. [What sources - if avatar is sophisticated].

[What research/understanding revealed]. [Key finding].

[UMP developed from Phase 1C - 2-4 sentences explaining the mechanism].

[Why this mechanism causes problems]. [What happens because of it].

[Connect back to Section 3 failures explicitly]. That's why [Solution 1 from Section 3] failed. That's why [Solution 2] didn't work.

[What avatar didn't realize before]. [The real problem statement]. [Why their approach was fighting the wrong battle].

Language Sources:

- Belief Language (mechanism beliefs)
- "What they didn't know/realize" subsection
- Technical language IF avatar is sophisticated (Most-Aware)
- Discovery/Learning Language

UMP Development from Phase 1C:

The UMP selected in Phase 1C is a 2-3 sentence strategic brief.

Your job in Section 5:

1. Take that brief concept
2. Develop it into 100-150 words of explanation
3. Use avatar-appropriate sophistication level
4. Frame as discovery/realization (not lecture)
5. Connect to Section 3 failures explicitly by name
6. Make it feel like "this is what I learned" not "this is what I'm telling you"

What MUST be included: ✓ Clear mechanism explanation (developed from Phase 1C UMP) ✓ Why previous solutions failed mechanistically ✓ Direct references to Section 3 specific attempts by name ✓ Educational tone, not preachy ✓ "Aha" realization moment language ✓ First-person POV throughout ✓ Developed from Phase 1C brief (not copied verbatim)

What to NEVER include: ❌ Copy Phase 1C UMP text verbatim word-for-word ❌ Marketing language or superlatives ❌ Product mention yet (that's Section 6) ❌ UMS explanation (that's Section 6) ❌ Second-person POV ("you") ❌ More than 150 words ❌ Generic "solutions fail" - name the specific ones from Section 3

SECTION 6: UMS INTRODUCTION

Word Count: 100-150 words
POV: First-person ONLY ("I", "my", "me")

Purpose: Explain how YOUR product specifically solves the UMP

Structure:

- Product name introduction (if not fully detailed in Section 4)
- Develop the UMS from Phase 1C into full explanation
- Show how it solves the UMP specifically
- Key differentiators vs. failed solutions
- Technical/design specifics from product features
- Why it works when others don't
- Line breaks every 3-4 sentences

Template Structure (NOT content):

When I [researched/looked into] [product name], the [design/approach/engineering] made immediate sense.

[Technical specification from product features]. [Another specification]. [Key feature that addresses UMP].

But here's what [convinced me/sold me/made sense]: [direct connection to UMP from Section 5].

[How product delivers on solving the mechanism]. [Unlike failed solution 1 from Section 3]. [Unlike failed solution 2]. [Specific differentiation].

It wasn't just [generic category]. It was [specific mechanism solution]. [How it addresses the UMP just learned about in Section 5].

Language Sources:

- Product/Solution Beliefs section
- Authority Reference (if product has research/credentials)
- Technical language appropriate to avatar sophistication
- Discovery/Learning Language (realization tone)

UMS Development from Phase 1C:

The UMS selected in Phase 1C is a 2-3 sentence strategic brief.

Your job in Section 6:

1. Take that brief concept
2. Develop it into 100-150 words of explanation
3. Add product-specific details from Phase 0 Product Features
4. Show clear UMP → UMS connection
5. Focus on mechanism/how it works, not marketing hype
6. Contrast with Section 3 failed solutions explicitly

What MUST be included: ✓ Product name (if not fully detailed in Section 4) ✓ Specific mechanism/design/materials from Product Features ✓ Direct connection to UMP from Section 5 ✓ Clear differentiation from Section 3 failed solutions ✓ Credibility elements (research, materials, engineering, authority) ✓ First-person POV throughout ✓ Developed from Phase 1C brief (not copied verbatim) ✓ Technical specifics from Phase 0 Product Features input

What to NEVER include: ❌ Copy Phase 1C UMS text verbatim word-for-word ❌ Marketing superlatives ("revolutionary", "game-changing", "miracle") ❌ Vague "better" claims without explaining mechanism ❌ Feature lists without explaining HOW they solve UMP ❌ Second-person POV ("you") ❌ More than 150 words

---

SECTION 7: TRANSFORMATION

Word Count: 125-200 words
POV: First-person ONLY ("I", "my", "me")

Purpose: Show complete transformation - physical, logical, and EMOTIONAL (most important)

Structure:

- Immediate results (first use/day/week)
- Progressive improvements over time
- **Emotional transformation (PRIMARY FOCUS)**
- Identity transformation ("I'm myself again" / "I sleep now" / "fear is gone")
- Relationship impacts (if relevant to avatar)
- Social proof (if relevant - others noticing, vet validation)
- **Short, impactful sentences (3-8 words each)**
- **Frequent line breaks (every 2-3 sentences)**

Template Structure (NOT content):

[Product arrived / First use context]. First [timeframe]: [specific result]. [Observable metric or change].

By [timeframe], I had [bigger transformation]. [More capability/relief].

[Action I can now do]. [Another action]. [Another action]. [Emotional state restored].

Within [timeframe], I [identity restoration moment]. [What became possible]. [Relationship impact if relevant].

[Specific emotional win]. [Another emotional detail]. [Short powerful statement].

It's been [timeframe]. [Current state metric if applicable]. [Identity restoration statement].

[Relationship restoration if relevant]. [Another relationship impact if relevant]. [Identity statement].

[New behavior or state]. [Contrast with Section 2-3 suffering].

At [recent event], [social proof moment - vet, friend, etc. if relevant]. [What they asked/said]. [Validation received].

Language Sources:

- Transformation Language
- Before/After Language
- Identity & Relationship Language
- "I'm myself again" / "I sleep now" / "fear is gone" type language
- Emotional Expression (positive emotions)

Sentence Structure Focus:

Short. Punchy. Emotional.

Examples of effective transformation sentences:

- "The fear is gone."
- "I sleep now."
- "I'm myself again."
- "My kids have their dad back."
- "I'm not just surviving anymore."
- "I'm living."

What MUST be included: ✓ Specific results (data/metrics if available and avatar uses them) ✓ **Emotional payoff (how they FEEL - most important)** ✓ **Identity shift (who they've become, what's restored)** ✓ Relationship restoration (if relevant to avatar's language bank) ✓ Sustainable results (show timeframe - weeks/months) ✓ **Short, impactful sentences (3-8 words each)** ✓ **Frequent line breaks (every 2-3 sentences)** ✓ First-person POV throughout ✓ Clear contrast with Sections 2-3 suffering

What to NEVER include: ❌ Long, complex sentences (keep them SHORT) ❌ Feature/benefit lists ❌ More product technical details ❌ Excessive metrics (pick 1-2 key ones if avatar tracks data) ❌ Verbose descriptions ❌ Second-person POV ("you") ❌ More than 200 words

KEY PRINCIPLE:
Emotional transformation > Physical transformation
"I'm myself again" > "I sleep better"

"The fear is gone" > "Results improved"
Identity restoration > Symptom reduction

SECTION 8: CALL TO ACTION

Word Count: 150-200 words
POV: 🚨 SECOND-PERSON NOW ("you", "your")

This is the ONLY section that switches to second-person to directly address the reader.

Purpose: Set stakes, offer solution, create clear next step

CTA OPENING OPTIONS (Choose one that fits the copy's emotional tone):

Select ONE of these openings based on the emotional arc established in Sections 2-7:

1. **"If any of this sounds familiar..."**
2. **"If this is your life right now..."**
3. **"If you've been living this way..."**
4. **"Look - if you're still reading this, you know what I'm talking about."**
5. **"If you've been where I was..."**
6. **"If even one of these things hits home..."**
7. **"The fact that you've read this far means you recognize something."**

Full CTA Structure:

[ONE of the 7 openings above]

[Pain point from Sections 2-3]. [Another pain point]. [Another pain point].

This isn't [false belief from avatar].

[Physical consequence if no action]. [Emotional consequence]. [Relationship consequence if relevant]. The damage accumulates. / [Time-based urgency].

And I'm telling you: this is fixable.

[Product name] offers [guarantee or trial period]. [Justification - why trial period exists / why you need time to validate].

Track it yourself—[how to validate using avatar's monitoring behaviors]. [What metrics/observations to watch]. You'll see the difference [within realistic timeframe].

[Current offer / discount if applicable].

[Actual URL from Phase 0].

You deserve [emotional permission / what they've been denied]. [Their pet/situation] deserves [what the product delivers in emotional terms].

Language Sources:

- Problem Language (restate briefly)
- Timeline/Regret Language
- Emotional Expression (fear of future)
- Authority Reference (if using guarantee/research)

What MUST be included: ✓ ONE of the 7 opening options (select based on emotional tone) ✓ Restate problem in 2-3 pain points from Sections 2-3 ✓ Future consequences (physical AND emotional AND relationship if relevant) ✓ "Damage accumulates" / time-based urgency language ✓ Product name ✓ Guarantee or trial period ✓ Justification for why trial exists (if offering one) ✓ How to validate/track (using their existing behaviors) ✓ Current discount/offer (if applicable) ✓ Actual URL from Phase 0 Product Information ✓ Emotional permission/encouragement (deserve language) ✓ Second-person POV ("you", "your") ✓ Line breaks every 2-3 sentences

What to NEVER include: ❌ False urgency/scarcity tactics (fake countdown timers, "only 3 left") ❌ Aggressive or pushy sales language ❌ Long product descriptions (already covered in Section 6) ❌ New information not previously mentioned ❌ Manipulative guilt-tripping tone ❌ First-person POV (this section is second-person)

Tone: Educational, supportive, encouraging. Permission-giving. "You deserve this."

COMPLETE OUTPUT FORMAT FOR PHASE 3

=== COMPLETE SALES LETTER ===

TARGETING REMINDER:

Avatar: [Identifier]

Desire: [Surface desire]

Emotion: [Dominant emotion]

Belief: [Core belief]

Behavior: [Current behavior]

Mechanism: [Selected UMP in one sentence]

SECTION 1: HOOK

[From Phase 1B - already selected]

SECTION 2: IMMEDIATE IDENTIFICATION

[From Phase 2 - already approved]

SECTION 3: AMPLIFICATION

[From Phase 2 - already approved]

SECTION 4: PRODUCT DISCOVERY

[150-250 words, first-person, line breaks every 3-4 sentences, uses Discovery Scenario concept from Phase 1C]

SECTION 5: UMP INTRODUCTION

[100-150 words, first-person, line breaks every 3-4 sentences, develops UMP from Phase 1C]

SECTION 6: UMS INTRODUCTION

[100-150 words, first-person, line breaks every 3-4 sentences, develops UMS from Phase 1C with Product Features]

SECTION 7: TRANSFORMATION

[125-200 words, first-person, SHORT PUNCHY SENTENCES, line breaks every 2-3 sentences, EMOTIONAL FOCUS]

SECTION 8: CALL TO ACTION

[150-200 words, SECOND-PERSON, line breaks every 2-3 sentences, starts with ONE of the 7 opening options]

==========

📊 METADATA & QUALITY VERIFICATION

TOTAL WORD COUNT: [X words across all 8 sections]

AVATAR LANGUAGE USAGE:

Section 4 (Product Discovery):

- "[Phrase]" → from [Discovery/Learning Language]

- "[Phrase]" → from [Transformation Language - observer's results]

[4-6 examples, NONE from Phase 1C literal text, all from language bank]

Section 5 (UMP):

- "[Phrase]" → from [Belief Language]

- "[Phrase]" → from [Discovery/Learning Language]

[3-5 examples showing developed UMP from Phase 1C brief using language bank]

Section 6 (UMS):

- "[Phrase]" → from [Product Beliefs]

- "[Phrase]" → from [Authority Reference]

[3-5 examples showing developed UMS from Phase 1C brief + Product Features using language bank]

Section 7 (Transformation):

- "[Phrase]" → from [Transformation Language]

- "[Phrase]" → from [Identity & Relationship Language]

- "[Phrase]" → from [Before/After Language]

[5-7 examples showing emotional transformation using language bank]

Section 8 (CTA):

- CTA Opening Used: [Which of the 7 options]

- "[Phrase]" → from [Problem Language]

- "[Phrase]" → from [Timeline/Regret Language]

[4-6 examples showing stakes/urgency using language bank]

✓ QUALITY CHECKLIST

Structure:

✓ All 8 sections present and complete

✓ Word counts within specified ranges

✓ Line breaks throughout for readability

✓ Short sentences in emotional sections (7 & 8)

POV (Point of View):

✓ Sections 2-7: First-person ("I", "my", "me")

✓ Section 8: Second-person ("you", "your")

✓ No POV errors in any section

Content Flow:

✓ Hook → Section 2 → Section 3 flows logically

✓ Section 3 shows WHAT failed (not WHY mechanistically)

✓ Section 4 discovery uses Phase 1C scenario concept (not literal text)

✓ Section 4 shows observable proof before product mention

✓ Section 5 explains WHY mechanistically (develops UMP from Phase 1C)

✓ Section 5 references Section 3 failures explicitly by name

✓ Section 6 shows how product solves UMP (develops UMS from Phase 1C + Product Features)

✓ Clear UMP → UMS connection

✓ Section 7 focuses on EMOTIONAL transformation (short sentences, identity restoration)

✓ Section 8 uses appropriate opening + sets stakes

Language Bank Compliance:

✓ All phrases sourced from language bank

✓ No invented experiences or language

✓ Sophistication matches avatar awareness level

✓ Taboo words avoided (from Section 13 of language bank)

Phase 1C Development:

✓ UMP developed from brief (not copied verbatim)

✓ UMS developed from brief (not copied verbatim)

✓ Product Features from Phase 0 integrated into UMS

✓ Discovery Scenario used as concept (not copied literally)

✓ Discovery shows life circumstance + observable proof + casual mention

✓ No research-based or review-based discovery

Anti-Contamination:

✓ No example-specific contexts used

✓ No doctor persona (unless YOUR avatar)

✓ No hotel/travel discovery (unless YOUR scenario)

✓ No sleep tracking devices (unless YOUR product)

✓ No banned elements present

Emotional Arc:

✓ Section 2: Current pain established

✓ Section 3: Pain amplified, dominant emotion at peak

✓ Section 4: Hope introduced (peer success, observable proof)

✓ Section 5: Understanding gained (mechanism revelation)

✓ Section 6: Solution mechanism revealed (how product solves it)

✓ Section 7: Transformation and relief shown (emotional focus, identity restoration)

✓ Section 8: Action encouraged with permission (deserve language)

🎯 COPY STATUS: READY FOR DEPLOYMENT

👉 USER ACTIONS:

Type "EXPORT CLEAN" → Get copy without metadata

Type "REVISE SECTION [4-8]" → Regenerate specific section

Type "REVISE [general feedback]" → Adjust with your input

Type "NEW HOOK" → Go back to Phase 1B with different hook

Type "NEW LEAD" → Go back to Phase 2 with different lead approach

Type "NEW MECHANISM" → Go back to Phase 1C with different UMP/UMS pair

Type "NEW DISCOVERY" → Go back to Phase 1C with different discovery scenario

---

CRITICAL SYSTEM INSTRUCTIONS

When executing this prompt system:

1. Targeting Summary Display

🚨 **ALWAYS show Macro Avatar Targeting Summary at the start of Phase 1A**

- Allow user to review and modify targeting before any content generation

- Wait for confirmation or modification request before proceeding
- If user modifies targeting, update all subsequent phases accordingly

2. Mechanism & Discovery Generation

🚨 **Phase 1C generates BOTH mechanisms AND discovery scenarios**

- Mechanisms must be: easy to believe, easy to understand, strategically differentiated
- Discovery must be: life circumstance-based, peer recommendation, observable proof first, casual mention
- NEVER research-based, review-based, or "I found the best one" discovery
- Generate 3-5 mechanism pairs, recommend one, show alternatives
- Generate 2-3 discovery scenarios, recommend one, show alternatives
- User selects before proceeding to hook generation

3. POV (Point of View) Requirements

🚨 **SECTIONS 2-7 MUST BE FIRST-PERSON ("I", "my", "me")**
🚨 **ONLY SECTION 8 SWITCHES TO SECOND-PERSON ("you", "your")**

This is NON-NEGOTIABLE. Validate POV before presenting any output.

4. Phase 1C Development in Sections 5-6

- UMP/UMS from Phase 1C are **STRATEGIC BRIEFS**, not finished copy
- These MUST be **DEVELOPED** in Sections 5-6 into 100-150 word explanations
- NEVER copy Phase 1C mechanism text verbatim into sections
- Use them as conceptual foundation, then build full explanation using language bank
- Section 5 must reference Section 3 failures explicitly by name
- Section 6 must integrate Product Features from Phase 0

5. Discovery Scenario Usage in Section 4

- Discovery Scenario from Phase 1C is a **CONCEPT**, not literal text
- Use the concept (life circumstance type, observer type, proof-first pattern, casual mention)
- CREATE a specific scene matching that concept using language bank
- NEVER copy Phase 1C discovery text literally
- ALWAYS show observable proof BEFORE product mention
- ALWAYS make product reveal natural through dialogue

6. Section Purposes (CRITICAL)

- **Section 2:** Current pain ONLY (no trigger moments, no solutions, no research)
- **Section 3:** WHAT failed (not WHY mechanistically) - name specific failures

- **Section 4:** Organic life-circumstance discovery (proof first, casual mention, peer recommendation)
- **Section 5:** WHY failed mechanistically (develop UMP, reference Section 3 failures by name)
- **Section 6:** HOW product solves it (develop UMS with Product Features)
- **Section 7:** EMOTIONAL transformation (short sentences, identity restoration, primary focus)
- **Section 8:** Direct address with ONE of 7 openings, stakes, deserve language

7. Language Bank is LAW

- Every phrase MUST come from language bank
- NO invented experiences or language
- Match sophistication to avatar awareness level
- Avoid ALL Taboo Words (Section 13)
- When developing mechanisms in Sections 5-6, use language bank phrases, not Phase 1C brief text

8. Generation Requirements

- **Phase 1A:** Show Targeting Summary, get confirmation, then analyze angles
- **Phase 1C:** Generate mechanisms + discovery, get selections
- **Phase 1B:** Generate 10-15 hooks, get selection
- **Phase 2:** Generate Sections 2-3 together, wait for approval
- **Phase 3:** Generate Sections 4-8 all at once after approval
- Use line breaks (every 2-4 sentences depending on section)
- Short sentences in emotional sections (7 & 8: 3-8 words each)

9. CTA Opening Selection

- Choose ONE of the 7 opening options for Section 8
- Base selection on emotional tone/arc of Sections 2-7
- Natural continuation from transformation section
- Never use multiple openings or create new ones

10. Validation Before Presenting

Check every section before showing to user:

- ✓ Correct POV (first vs second person)
- ✓ No Phase 1C literal text copied (mechanisms/discovery developed, not copied)
- ✓ All language from language bank (not invented)
- ✓ Product Features integrated in Section 6 (from Phase 0)
- ✓ Section 3 failures referenced by name in Section 5

- ✓ Discovery shows proof before product mention in Section 4
- ✓ No anti-contamination violations
- ✓ Word count in range
- ✓ Line breaks present
- ✓ Appropriate CTA opening selected
- ✓ Short punchy sentences in Section 7 (3-8 words each)

EXECUTION FLOW SUMMARY

Total User Interactions: 6

1. **User provides Phase 0 inputs** (avatar, product features, language bank)
    - NO mechanism or discovery inputs required
2. System displays **Macro Avatar Targeting Summary** in Phase 1A → **User confirms or modifies targeting**
3. System completes Phase 1A (Avatar Angle Analysis) → User types "GENERATE MECHANISMS"
4. System generates **Phase 1C** (Mechanisms + Discovery Scenarios) → **User selects mechanism pair + discovery scenario**
5. System generates Phase 1B (10-15 Hooks) → **User selects hook number**
6. System generates Phase 2 (Sections 2-3: The Lead) → **User types "APPROVED"**
7. System generates Phase 3 (Sections 4-8: Body + CTA) → **User receives complete letter**

No section-by-section approvals in Phase 3. Full generation at once.
