PROMPT: "CREDIBILITY THROUGH EXPERIENCE" FRAMEWORK (AUTHORITY-FIGURE COPY)

Copy and paste everything below into Claude with your inputs.

REQUIRED INPUTS

I am generating ad copy for my brand **[YOUR BRAND NAME]**. We sell **[PRODUCT].**

We are writing for **[INSERT MACRO AVATAR # HERE]**

Our website is **[YOUR WEBSITE].**

[COPY & PASTE PRODUCT DESCRIPTION]

[ATTACH MACRO AVATAR SHEET OUTPUT]

[ATTACH MACRO AVATAR LANGUAGE BANK OUTPUT]

WHAT THIS FRAMEWORK DOES

Generates short-form, skimmable ad copy (400-600 words) using "Credibility Through Experience" framework.

This framework builds authority through lived experience, not professional credentials.

Structure:

1. Authority introduction (2-3 sentences)
2. Numbered list of benefits/reasons (5-7 items, 2-3 sentences each)
3. Backstory (3-4 sentences about what didn't work)
4. Product introduction (2-3 sentences)
5. How it works (3-4 sentences)

6. Social proof + Emotional desire resolution + CTA (3-5 sentences)

Total length: 400-600 words

Optimized for Facebook/Instagram: Heavy use of line breaks, strategic emojis, maximum mobile scannability.

PHASE 1: PAIN POINT SELECTION

First, I'll analyze your Macro Avatar sheet and extract all the pain points.

OUTPUT:

=== PAIN POINTS IDENTIFIED ===

Based on your Macro Avatar sheet, here are the primary pain points:

1. [Pain point from avatar sheet]
    - Emotional intensity: [X/5 based on language bank]
    - Primary emotion: [Fear/Frustration/Anxiety/Guilt]
    - Core desire behind this pain: [What they emotionally want - e.g., "Stop living in constant fear", "Feel in control again", "Sleep peacefully"]
    - Language bank coverage: [Strong/Moderate/Light]
2. [Pain point from avatar sheet]
    - Emotional intensity: [X/5]
    - Primary emotion: [Fear/Frustration/Anxiety/Guilt]
    - Core desire behind this pain: [What they emotionally want]
    - Language bank coverage: [Strong/Moderate/Light]
3. [Pain point from avatar sheet]
    - Emotional intensity: [X/5]
    - Primary emotion: [Fear/Frustration/Anxiety/Guilt]
    - Core desire behind this pain: [What they emotionally want]
    - Language bank coverage: [Strong/Moderate/Light]
4. [Pain point from avatar sheet]
    - Emotional intensity: [X/5]
    - Primary emotion: [Fear/Frustration/Anxiety/Guilt]
    - Core desire behind this pain: [What they emotionally want]
    - Language bank coverage: [Strong/Moderate/Light]

[Continue for all pain points found in avatar sheet, typically 3-7 total]

👉 SELECT THE PAIN POINT FOR THIS AD: Type the number (1-7)

PHASE 2: PAIN POINT LANGUAGE EXTRACTION

Now I'll extract the exact language your avatar uses for the selected pain point.

OUTPUT:

=== PAIN POINT LANGUAGE EXTRACTION ===

Pain Point Being Addressed: [The selected pain point]

Core Emotional Desire: [What they want emotionally - extracted from avatar's language about desires/transformation]

Avatar's Exact Language (From Language Bank):

Primary phrases (use these in opening):

- "[Exact phrase from language bank]" from [Section name]
- "[Exact phrase from language bank]" from [Section name]
- "[Exact phrase from language bank]" from [Section name] [3-5 phrases total that directly relate to this pain point]

Supporting phrases (use throughout body):

- "[Exact phrase from language bank]" from [Section name]
- "[Exact phrase from language bank]" from [Section name]
- "[Exact phrase from language bank]" from [Section name] [3-5 phrases total]

Failed solution phrases (use in backstory section):

- "[Exact phrase about what didn't work]" from [Section name]
- "[Exact phrase about what didn't work]" from [Section name] [2-3 phrases total]

Desire resolution phrases (use for emotional resolution):

- "[Exact phrase about what they want emotionally]" from [Section name]

- "[Exact phrase about desired state]" from [Section name] [2-3 phrases about relief, peace, control, confidence - whatever the emotional desire is]

Emotional Tone: [Primary emotion for this specific pain point: Fear/Frustration/Anxiety/Guilt/Desperation]

Intensity Level: [X/5 - how intense is this pain point for the avatar]

Authority Hook Options:

Based on your avatar profile and this pain point, here are 3 options for establishing authority through lived experience:

Option 1: Experience-Based Authority "I've been dealing with [this specific problem] for [X] years"

Example for your avatar: [Generate specific example based on avatar's timeline/experience]

Option 2: Survival Authority "I've been through [specific crisis/event related to this pain] and learned the hard way"

Example for your avatar: [Generate specific example based on avatar's trigger experiences]

Option 3: Journey Authority "After [specific trigger moment], I became obsessed with solving [this problem]"

Example for your avatar: [Generate specific example based on avatar's core experience]

👉 SELECT YOUR AUTHORITY HOOK: Type the number (1-3) or provide your own version that fits your brand voice.

Once selected, type "CONTINUE TO EMOJI SELECTION"

PHASE 2B: EMOJI STRATEGY

Now I'll analyze your product, avatar, and pain point to recommend contextually appropriate emojis.

OUTPUT:

=== EMOJI RECOMMENDATIONS ===

Context Analysis:

Product category: [Category - e.g., health, beauty, pet care, fitness, etc.] Avatar demographics: [Gender, age range, key characteristics] Pain point emotion: [Primary emotion from Phase 2] Brand voice: [Formal/Casual/Professional/Playful - inferred from product and avatar]

Recommended Emoji Set for This Ad:

For Benefits (3-5 options): ✅ [Checkmark - universal] [Emoji] - [Why this makes sense for this context] [Emoji] - [Why this makes sense for this context] [Emoji] - [Why this makes sense for this context]

For Problems/Negatives (2-3 options): ❌ [X mark - universal] [Emoji] - [Why this makes sense for this context] [Emoji] - [Why this makes sense for this context]

For Transformation/Results (2-3 options): ✨ [Sparkles - universal transformation] [Emoji] - [Why this makes sense for this context] [Emoji] - [Why this makes sense for this context]

For Product Emphasis (1-2 options): [Emoji] - [Why this makes sense for this context] [Emoji] - [Why this makes sense for this context]

For CTA (1-2 options): 👉 [Pointing finger - universal] [Emoji] - [Why this makes sense for this context]

Total Emoji Budget: 8-15 emojis across the entire ad (not overused)

Example Placement Strategy:

- Section 2 (List): Number emojis (1️⃣2️⃣3️⃣) + 2-3 benefit/problem emojis
- Section 3 (Backstory): 1-2 problem emojis
- Section 4 (Product): 1 product emphasis emoji
- Section 5 (How It Works): 1-2 benefit emojis
- Section 6 (CTA): 1 CTA emoji

👉 APPROVE EMOJI STRATEGY: Type "APPROVED" to use these emojis Type "MODIFY: [your changes]" to adjust emoji choices Type "MINIMAL EMOJIS" to only use ✅ ❌ ✨ 👉

Once approved, type "GENERATE COPY"

PHASE 3: COPY GENERATION

Now I'll generate the complete ad using the approved emoji strategy.

CRITICAL WRITING RULES

1. AVATAR LANGUAGE IS EVERYTHING

The first 3-5 sentences MUST use exact phrases from the language bank primary phrases list.

Don't just reference them. Actually use them word-for-word in a natural way.

Throughout the rest of the copy, continue sprinkling language bank phrases naturally.

2. SENTENCE STRUCTURE

Average sentence length: 8-12 words.

Mix short and slightly longer sentences for natural rhythm.

Use conversational transitions:

- "And honestly?"
- "Here's the thing..."
- "But here's what's crazy..."
- "The problem was..."
- "So I finally..."

Start sentences different ways. Vary the rhythm. Make it flow like actual human speech, not AI.

3. FORMATTING FOR FACEBOOK/INSTAGRAM (CRITICAL)

Line Breaks:

- Break after every 1-2 sentences maximum
- Create tons of white space

- Makes it scannable on mobile
- Think: how does this look on a phone screen?

Emoji Usage:

- Use ONLY the approved emojis from Phase 2B
- Total of 8-15 emojis across entire ad
- Strategic placement for emphasis and scannability
- Do NOT overuse

Paragraph Structure:

- 1-2 sentences per paragraph MAX in Sections 3-6
- Then line break
- Some single sentences get their own paragraph for emphasis
- Create visual rhythm with varied line lengths

NO DENSE BLOCKS:

- If a paragraph is longer than 2 sentences, break it up
- Especially in Sections 3-6 (backstory, product intro, how it works, CTA)
- Every 1-2 sentences = new line break

4. THE NUMBERED LIST (SECTION 2)

Each item gets a number emoji (1️⃣ 2️⃣ 3️⃣ etc).

Each item has a bold title, then 2-3 sentences explanation.

Keep it benefit-focused and scannable.

Don't make the list items too similar. Vary what each one addresses.

5. NO PROFESSIONAL CREDENTIALS

Do NOT impersonate doctors, veterinarians, or licensed professionals.

Authority comes from experience:

- "I've been through this"
- "I've tried everything"
- "I learned the hard way"
- "After [event], I became obsessed with solving this"

6. NATURAL CONVERSATIONAL TONE

Write like you're talking to a friend who has this problem.

Not formal. Not corporate. Not salesy.

Just real, human, relatable.

7. EMOTIONAL DESIRE RESOLUTION (NEW)

In Section 6, after social proof and before CTA, include 1-2 sentences that resolve the core emotional desire.

This is NOT about the functional outcome (e.g., "your cat drinks more water").

This IS about the emotional payoff (e.g., "you can finally stop living in constant fear").

Use desire resolution phrases from the language bank.

COPY OUTPUT

=== THE EXPERIENCED OWNER AD ===

TARGETING REMINDER: Avatar: [Identifier] Pain Point: [The specific pain being addressed] Core Emotional Desire: [What they want emotionally] Emotional Tone: [Primary emotion] Intensity: [X/5] Authority Hook: [The one selected/provided] Emoji Strategy: [Approved emoji set]

SECTION 1: AUTHORITY INTRODUCTION

[Authority hook - 1-2 sentences]

[Line break]

[Context/trigger - 1 sentence using language bank phrase]

[Line break]

[Transition to list - 1 sentence]

Word count target: 40-60 words

Formatting: Line breaks after every 1-2 sentences

SECTION 2: THE LIST

[Transition sentence: "Here are X reasons..." or "Here's what I learned..."]

[Line break]

1️⃣ **[Benefit/Reason Title]**

[2-3 sentences explaining this benefit] [Use conversational language] [Optional emoji from approved set if emphasizing benefit or problem]

[Line break]

2️⃣ **[Benefit/Reason Title]**

[2-3 sentences] [Different angle than #1]

[Line break]

3️⃣ **[Benefit/Reason Title]**

[2-3 sentences] [Different angle]

[Line break]

4️⃣ **[Benefit/Reason Title]**

[2-3 sentences] [Different angle]

[Line break]

5️⃣ **[Benefit/Reason Title]**

[2-3 sentences] [Different angle]

[Line break]

[Optional 6️⃣ and 7️⃣ if strongly supported by avatar research]

Word count target: 200-300 words

Formatting: Each list item separated by line breaks, 2-3 sentences per item

---

SECTION 3: THE BACKSTORY

[Transition: "But here's the thing..." or "The problem was..."]

[Line break after 1-2 sentences]

[What you tried that didn't work - use failed solution phrases from language bank]

[Line break after 1-2 sentences]

[Why it didn't work / frustration]

[Line break after 1-2 sentences]

[Optional emoji from approved problem set for emphasis]

[Peak frustration moment]

Word count target: 50-80 words

Formatting: CRITICAL - Line break after every 1-2 sentences maximum. NO dense paragraphs.

Example format:

> But here's the thing.
>
> I tried everything first.
>
> [Failed solution using language bank phrase]. [Why it didn't work].
>
> [Optional problem emoji] [Frustration statement].
>
> [Peak moment].

SECTION 4: PRODUCT INTRODUCTION

[Transition: "That's why I..." or "So I finally..." or "Then I discovered..."]

[Line break after 1-2 sentences]

[Product name + what it is]

[Line break after 1-2 sentences]

[Key differentiator]

[Line break after 1-2 sentences]

[Optional product emphasis emoji from approved set]

[Why it's different]

Word count target: 40-60 words

Formatting: Line break after every 1-2 sentences. Keep breathable.

Example format:

> That's when I found [Product Name]. [Emoji if approved]
>
> [What it is - 1 sentence].
>
> [Key differentiator - 1 sentence].
>
> [Why it's different - 1 sentence].

SECTION 5: HOW IT WORKS

[How it works - 1-2 sentences]

[Line break]

[Key feature/benefit - 1 sentence] [Optional benefit emoji from approved set]

[Line break]

[Another feature/benefit - 1 sentence] [Optional benefit emoji from approved set]

[Line break]

[Why it solves the problem from Section 3 - 1-2 sentences]

Word count target: 50-80 words

Formatting: Line break after every 1-2 sentences. Use approved benefit emojis strategically.

Example format:

> [How it works mechanically].
>
> [Emoji if approved] [Key feature].
>
> [Emoji if approved] [Another feature].

[Why it solves the problem].

SECTION 6: SOCIAL PROOF + EMOTIONAL RESOLUTION + CTA

[Social proof - personal result or numbers - 1-2 sentences]

[Line break]

EMOTIONAL DESIRE RESOLUTION (NEW - CRITICAL):

[1-2 sentences resolving the core emotional desire using desire resolution phrases from language bank]

[This should address what they EMOTIONALLY want, not just functional outcomes]

[Use phrases like: "And you can finally stop...", "No more living in constant...", "You can stop feeling..."]

[Line break]

[CTA emoji from approved set] [Direct call to action - 1 sentence]

[Line break]

[Risk reversal - 1 sentence]

[Line break]

[URL]

Word count target: 50-80 words

Formatting: Line break after every 1-2 sentences. Emotional resolution should feel like relief.

Example format:

> [Personal result or social proof].
>
> And you can finally [emotional desire resolution using language bank phrase]. [Optional second sentence reinforcing emotional relief].
>
> 👉 [Direct CTA action].
>
> [Risk reversal/guarantee].

==========

📊 COPY METADATA

Total Word Count: [X words - should be 400-600]

Avatar Language Integration:

Section 1 (Authority Introduction):

- "[Exact phrase used]" from [Language Bank Section]
- "[Exact phrase used]" from [Language Bank Section]

Section 2 (The List):

- "[Exact phrase used]" from [Language Bank Section]
- "[Exact phrase used]" from [Language Bank Section]
- "[Exact phrase used]" from [Language Bank Section]

Section 3 (Backstory):

- "[Exact phrase used]" from [Language Bank Section]
- "[Exact phrase used]" from [Language Bank Section]

Section 4 (Product Introduction):

- "[Exact phrase used]" from [Language Bank Section]

Section 5 (How It Works):

- "[Exact phrase used]" from [Language Bank Section]

Section 6 (Social Proof + Emotional Resolution + CTA):

- "[Exact phrase used]" from [Language Bank Section]
- "[Exact phrase used for emotional resolution]" from [Language Bank Section - Transformation/Desire/Identity language]

Total phrases used: [X - should be 10-14 exact phrases integrated naturally]

Sentence Structure Analysis:

- Average sentence length: [X words - should be 8-12]
- Longest sentence: [X words]
- Shortest sentence: [X words]
- Rhythm variety: [Describe - should feel natural with varied rhythm]

Formatting Analysis:

Line Breaks:

- Total line breaks in Sections 3-6: [X - should be 10-15]
- Average sentences per paragraph: [X - should be 1-2]
- Dense blocks (3+ sentences without break): [X - should be 0]

Emoji Usage:

- Total emojis used: [X - should be 8-15]
- Breakdown by type:
    - Number emojis (1️⃣ 2️⃣ etc): [X]
    - Benefit emojis: [X]
    - Problem emojis: [X]
    - Product emphasis: [X]
    - CTA emoji: [X]
- All emojis from approved set: [Yes/No]

Mobile Readability:

- Scannability rating: [High/Medium/Low - should be High]
- White space usage: [Generous/Adequate/Insufficient - should be Generous]
- Visual rhythm: [Varied/Monotonous - should be Varied]

Emotional Resolution:

- Core desire addressed: [Yes/No]
- Uses desire resolution phrases from language bank: [Yes/No]
- Feels like emotional payoff/relief: [Yes/No]

✓ QUALITY CHECKLIST

Authority: ✓ Uses lived experience, not professional credentials ✓ No impersonation of doctors/vets/professionals ✓ Relatable and authentic voice ✓ Matches selected authority hook

Language Bank Integration: ✓ First 3-5 sentences use avatar's exact phrases ✓ Primary phrases used in opening ✓ Failed solution phrases used in backstory ✓ Desire resolution phrases used in Section 6 ✓ Language bank phrases sprinkled naturally throughout (10-14 total) ✓ Phrases feel integrated, not forced

Sentence Structure: ✓ Average 8-12 words per sentence ✓ Varied rhythm (not robotic or choppy) ✓ Conversational transitions used naturally ✓ Sentences start different ways ✓ Flows like human speech

Formatting (CRITICAL FOR FACEBOOK/INSTAGRAM): ✓ Line breaks after every 1-2 sentences in Sections 3-6 ✓ NO dense paragraph blocks ✓ Generous white space throughout ✓ Emojis used strategically (8-15 total) ✓ Only approved emojis from Phase 2B used ✓ Numbered list format in Section 2 ✓ Mobile-friendly and scannable

List Quality (Section 2): ✓ Each item has number emoji + bold title ✓ Each item is 2-3 sentences max ✓ Each item addresses different benefit/angle ✓ Items are distinct from each other

Story Flow: ✓ Opens with relatable authority ✓ List provides tangible value ✓ Backstory builds frustration using language bank ✓ Product introduced as natural discovery ✓ Mechanism explained simply ✓ Emotional desire resolved before CTA ✓ CTA includes risk reversal ✓ Addresses selected pain point throughout

Emotional Resolution (NEW): ✓ Section 6 includes 1-2 sentences resolving emotional desire ✓ Uses desire resolution phrases from language bank ✓ Addresses what they WANT emotionally (not just functional outcome) ✓ Feels like relief/release/permission ✓ Placed after social proof, before CTA

Tone: ✓ Conversational, not formal ✓ Relatable, not salesy ✓ Natural, not corporate ✓ Matches avatar's emotional intensity

---

👉 USER ACTIONS:

Type "APPROVED" → Copy is ready to use

Type "REVISE [section name]" → Regenerate specific section

Type "MORE LINE BREAKS IN [section name]" → Add more breathing room

Type "MORE AVATAR LANGUAGE IN [section name]" → Add more language bank phrases

Type "STRENGTHEN EMOTIONAL RESOLUTION" → Make the desire resolution more impactful

Type "ADJUST TONE TO [direction]" → Make it more [urgent/casual/empathetic/etc]

Type "DIFFERENT EMOJIS" → Go back to Phase 2B and select new emoji set

Type "SHORTEN TO 300-400" → Reduce length while maintaining structure and formatting

Type "LENGTHEN TO 500-700" → Expand with more detail

Type "NEW PAIN POINT" → Go back to Phase 1

Type "NEW AUTHORITY HOOK" → Go back to Phase 2

SYSTEM INSTRUCTIONS FOR CLAUDE

When executing this prompt:

Phase 1: Pain Point Selection

- Carefully read the Macro Avatar sheet
- Extract ALL pain points mentioned
- For each pain point, identify the core emotional desire behind it (what they want emotionally, not just functionally)
- Assess emotional intensity based on language bank
- Determine primary emotion (fear/frustration/anxiety/guilt) for each
- Check language bank coverage
- Present as numbered list
- Wait for user selection

Phase 2: Language Extraction

- Once pain point is selected, scan language bank for phrases related to that specific pain
- Pull exact phrases (word-for-word) from relevant sections
- Categorize phrases: primary (for opening), supporting (for body), failed solutions (for backstory), desire resolution (for emotional payoff)
- CRITICAL: Find 2-3 desire resolution phrases about what they want emotionally (relief, peace, control, confidence, etc.)
- Generate 3 authority hook options that match avatar's experience
- Each authority hook should feel authentic to this avatar
- Wait for user selection

Phase 2B: Emoji Strategy

- Analyze product category, avatar demographics, pain point emotion, brand voice
- Recommend contextually appropriate emojis
- Explain WHY each emoji makes sense for this specific context
- Provide 3-5 benefit emojis, 2-3 problem emojis, 2-3 transformation emojis, 1-2 product emojis, 1-2 CTA emojis
- Total budget: 8-15 emojis across entire ad
- Wait for user approval

Phase 3: Copy Generation

- Use selected authority hook in Section 1
- Use approved emoji set ONLY
- First 3-5 sentences MUST include primary phrases from language bank
- Throughout copy, naturally weave in supporting phrases
- In backstory section, use failed solution phrases
- **CRITICAL: In Section 6, after social proof and before CTA, include 1-2 sentences resolving the core emotional desire using desire resolution phrases from language bank**
- Keep sentences 8-12 words average
- Vary sentence structure and rhythm
- Use conversational transitions

CRITICAL FORMATTING RULES:

- Section 1: Line breaks after every 1-2 sentences
- Section 2: Numbered list with emojis, line breaks between items
- Section 3-6: Line break after EVERY 1-2 sentences maximum
- NO paragraph should be longer than 2 sentences in Sections 3-6
- Use approved emojis strategically (8-15 total)
- Create visual rhythm with white space

Emotional Resolution Requirements:

- Must appear in Section 6 after social proof
- Must use desire resolution phrases from language bank
- Should address emotional want (e.g., "stop living in fear", "feel in control again", "finally have peace of mind")
- Should NOT just restate functional outcome (e.g., "your cat drinks more water")
- Should feel like relief/release/permission
- 1-2 sentences maximum
- Place before CTA

Quality Validation Before Output:

- Check: Are language bank phrases used word-for-word?
- Check: Is average sentence length 8-12 words?
- Check: Does it flow naturally or sound robotic?
- Check: Are there line breaks after every 1-2 sentences in Sections 3-6?
- Check: Are there any dense paragraph blocks? (Should be NONE)
- Check: Are only approved emojis used?
- Check: Is total emoji count 8-15?
- Check: Does authority come from experience, not credentials?
- Check: Is emotional desire resolved in Section 6 before CTA?
- Check: Does emotional resolution use language bank phrases?
- Check: Is total word count 400-600?

CRITICAL REMINDERS

1. This is niche-agnostic

Works for any product/avatar as long as you have macro avatar sheet and language bank.

2. Emoji selection is contextual

Must analyze product + avatar + pain point to recommend appropriate emojis. No generic emoji prescriptions.

3. Formatting is non-negotiable

Sections 3-6 MUST have line breaks after every 1-2 sentences. NO dense blocks allowed.

4. Language bank phrases must be verbatim

Not paraphrased. Not referenced. Actually used word-for-word.

5. Mobile-first mindset

Every formatting decision should prioritize how this looks on a phone screen.

6. Authority without credentials

Never impersonate professionals. Authority from lived experience only.

7. The list items must be distinct

Each numbered item addresses a different benefit/angle.

8. Emotional resolution is CRITICAL (NEW)

Section 6 must resolve the core emotional desire, not just functional outcomes. This is the emotional payoff the reader has been waiting for.

NOW BEGIN WITH PHASE 1: PAIN POINT SELECTION
